Mingo Mine War Resumed At Dawn Today

MINE WAR BATTLE RAGING TODAY NEAR LOGAN

Hostilities Take On An Active Form. Both Sides Get Heavy Re-Enforcements.

SITUATION "NOT VERY HOPEFUL"

Casualties Reported In Morning Battle—Ohio Miners Reported On Way To Scene.

Washington, D. C., Aug. 31.—President Harding has drawn up a proclamation of martial law for the coal mine war area in West Virginia, Secretary of War Weeks announced today.

Battling Near Crooked Creek.

Charleston, W. Va, Aug. 31.—Miners and deputies are battling near Crooked Creek, below Logan, according to official advices received by Governor Morgan here today. One man has been killed and one taken prisoner, the advices reported. The victim was said to be a miner.

Major Thompson, returning here this afternoon after an investigation in the trouble zone, said the situation was "not very hopeful."

Battle Planes Spread Proclamation From the Air.

Logan, W. Va., Aug. 31.—Battle planes soared over Boone county early today ,showering down upon the masses of armed miners lying behind the ridge dividing Boone and Logan counties copies of the Proclamation issued yesterday by President Harding, calling on them to disperse.

Logan county's first line of defense, twenty miles long, up and down the valley of the Guyandotte river, bristled with rifles today as hundreds of armed voluteers poured in from other points to strengthen the forces that will bear the brunt of the assault if the miners attack.

Major C. F. Thompson, U. S. A. and two representatives of the United Mine Workers, arrived here today from Charleston by special train with copies of President Harding's proclamation which they will carry personally through the miners' outposts in the hills. They will make a final personal appeal to the miners to avert the disaster which is almost certain to follow their failure to comply with the proclamation, and disperse.

Deputy Sheriff Killed

Logan, W., a., Aug. 31.—John Core a deputy sheriff, was shot and killed during the battle at Blair this morning. iMners attacked the town charking up the mountanside were reported repulsed by the Logan first line defense guard. Col. Wm. Eubanks, in command of the state forces, has appealed to the governor for re-enforcements .

Ohio Miners Join In

Madison, W. Va., Aug. 31.—Armed miners continued to pass through this town today on their way to the mobilization camp of the miners near the Logan-coone county line.

When they arrived here they were told that President Harding had issued a proclamation requesting them to return peceably to their homes They shrugged their shoulders indecently and continued on their way.

No action was contemplated today by C & O railroad officials against the miners who last night seized and manned a train on the Blanch Rock branch line road to transport miners from the Coal River valley to Jeffre , where they joined the ranks of the union "army." The train was returned to the yards this morning in time to make its daily run.

Hundreds of miners were reported entering West irginia from Ohio to join in the attack. The number of recers was estimated this morning at 1500.

Misses Bertha and Olive Renaud of Kylertown are spending today in town.

Bloody Wednesday Dawns With All Berlin On Edge

Berlin, Aug. 31.—"Bloody Wednesday" dawned with all Berlin on edge with anxiety. Speculation as to whether fresh bloodshed would result was incited by the excited feeling of a hundred thousand workers gathered here to participate in the demonstrations.

The morning passed peacefully, with "Safety" police out in great numbers refusing even to permit verbal arguments in the ranks of the marching workers.

Chancellor Wirth was heavily guarded today following repeated threats that he would be assassinated before nightfall.

RAIL WORKERS VOTING FAVOR BIG WALKOUT

Returns Available At Many Rail Centers Against Wage Cut. Strike A Possibility.

Chicago, Ill., Aug. 31.—Members of the three large union organizations of rail workers are voting overwhelmingly in favor of a strike rather than accept a cut in wages according to information gathered by the United Press today at large railway centers.

The vote of trainmen, clerks and shop workers, being taken with other railroad organizations on the proposition of accepting a 12½ per cent. cut in wages or "leaving the service of the companies," strongly favors a walkout if further negotiations with railroad managers are unsuccessful.

Brotherhoods Voting On Strike Issue.

Cleveland, Ohio, Aug. 31.—Members of the five big rail brotherhoods who have headquarters here are voting directly on the question of a strike, it became known today. Copies of the ballots sent out to the half million membership of the five unions were obtained today by the United Press and show conclusively that the question is on whether to strike or accept the wage reduction offered by the United States Rail Labor Board.

Examination of the ballots show the wording is practically identical with that of the Trainmen, Clerks and Shop Workers' Unions, which have already voted overwhelmingly in favor of a walkout.

The five brotherhoods consist of trainmen, engineers, firemen and engine men, conductors, and switchmen are the "key" to the entire rail situation. A strike by them would inevitably result in a general tie up of the nation's railroad facilities, both union leaders and railroad officials agree.

BIG NAVAL BALLOON REPORTED BLOWN UP

Brockaway Point, N. Y., Aug. 31.—The Naval Air station here reported this morning that a naval ballon had exploded. It was said it had not as yet been determined whether anyone had been injured .

Washington, Aug. 31.—Fire caused by an explosion of gasoline today destroyed the naval balloon D-6 in its hangar at Rockaway Point, N. Y., the Navy Department announced today. There was no loss of life. Several men were slightly burned in the explosion, the Navy Department report said.

Frederick Faircaild Barratt, infant son of Mr. and Mrs. Fred F. Barratt, died at the home of his parents at 2 o'clock Tuesday morning.

Mr. and Mrs. John Bowman of Daisy street are visiting friends and doing some shopping in Philadelphia this week.

MACHINE GUN HALTS RIOT OF STRIKING MINERS

State Troops Rushed To Brownsville To Help Sheriff Quell Big Disturbance There.

Brownsville, Pa., Aug. 31.—State police were rushed to Simpson, near here early today to quell a threatened uprising of miners now on strike at the Mt. Allison works.

Sheriff I. I. Shaw and his deputies went to the scene of the disturbance this morning, taking with them a machine gun and the miners fled for cover.

MEXICAN COURT DECISION MAY SETTLE DISPUTE

Oil Land Clause In The Mexican Constitution Declared To Be Non-Retroactive.

Washington, Aug. 31.—Should the State Department find the reported decision of the Mexican Supreme Court on the oil land question as a flat recognition that no American property is to be confiscated, this government will begin immediately consideration of recognition of the Obregon government, it was declared here authoritatively today.

Although the State Department was without official confirmation of the decision of the Mexican court declaring Paragraph 4 of Article 27, of the Mexican constitution as non-retroactive, it was satisfied when first given news of the decision by the United Press that such a step would settle the long standing dispute.

"UNCLE JOE" CANNON NO "QUITTER"

Washington, D. C., Aug. 31.—"I'm no quitter" declared Uncle Joe Cannon today in denying reports he intended to retire from Congress at the end of his present term.

The former speaker of the House is now in his 86th year and has represented the 18th Illinois district for 23 terms, coming to congress in 1872.

He was not visibly affected by the report. He leaned back in his chair, smoking one of his favorite long black cigars while he waited for his secretry to type the statement denying it.

BELFAST ABLAZE AS RIOTING IS AGAIN RESUMED

Dozen Fires Burn In The Catholic Section Of Belfast Early Today.

DEATH TOLL IS NOW UP TO 13

Officers And Men Of The Irish Army Ordered To Be Ready To Fight.

Belfast, Ireland, Aug. 31.—Belfast was in flames early today. A dozen fires were burning in the Catholic section of the city. More troops were pouring in to the district where sporadic fighting and sniping from the housetops, accompanied by an occasional bomb explosion, continued thru the night. The death toll has now mounted to 8, with 54 wounded.

Irish Army Men In Readiness.

Dublin, Aug. 31.—Officers and men of the Irish Republican Army have been ordered to hold themselves in readiness for instant mobilization.

"The termination of the truce is threatened," the Irish Bulletin, Sinn Fein's official organ, declared today. Preparations for a resumption of hostilities are being made throughout the country.

Fighting Rages Among Shipworkers.

Belfast, Ire., Aug. 31.—Terriffic fighting broke out afresh today when shipyard workers, on their way to work, were ambushed and cut down by rifle fire in George and Queen street. One man was killed and scores of workers injured.

The military drew an armed cordon around the area where the fighting was most severe but at noon and during the lunch hour fighting was resumed. Rifles and grenades are being used by both sides and many casualties are reported.

Death Toll Now 13.

Belfast, Aug. 31.—Five more persons were killed in the fighting here today, bringing the death toll to 13 at 5 o'clock this evening, with the fighting still going on.

EFFICIENT MAYOR IMPROVES CONDITIONS OF COMMUNITY

To the citizens of Junior Chautauqua town and their Mayor, Ellwood Davis, the kiddies of the Children's Home send grateful thanks.

During its very short existence, busy town raised forty-five dollars, all the inhabitants working heroically together under the able leadership of Miss Lewis, the Junior director. The boys brought cushions and rented them to Chautauqua goers at the afternoon and evening sessions and the girls made candy and sold it.

With one accord it was agreed to use the money to give pleasure to comrads not so fortunate as themselves, so books, balls and playground equipment for the Children's Home will do their best to compensate for lack of fathers and mothers and honest to goodness homes.

Seigfried, the very capable second sacker of the Terriers, who suffered a badly sprained ankle in the first game on the local grounds with the Allegheny Steelers, and who has been visiting at his home the past ten days, returned to Clearfield last evening and will remain until the finish of the season.

---0---

The Osceola Steelers will be the attraction at the Driving Park on Thursday afternoon. Johnny Meader is scheduled to pitch for the Terriers and Knetzer will do the twirling for the Steelers and this should ensure a real baseball battle. Come out and see us do them.

---0---

Mt. Union will play here on Saturday afternoon instead of the Indiana team, which went up after last Saturday's game.

That game with the Philadelphia Athletics on September 7th should attract a record crowd to the local park.

This Satisfies the Curious

"Say, what building's that?" Every Washington visitor used to ask street car conductors and traffic cops that when they passed the Post-office Department on Pennsylvania Avenue. Now Will Hays postmaster general has put a sign over the door to identify the place.

ATTORNEY GENERAL MAKES STRONG APPEAL FOR LAW ENFORCEMENT

First Public Speech Since He Took Up His Official Duties

For the first time since assuming his post as Attorney General of the United States, Attorney General Daugherty today came forth from behind his barrage of legality, and addressing the Ohio State Bar Association at its meeting at Cincinnati, charged full tilt at the ranks of lawbreakers. Decrying the present movement toward lawlessness and non observance of the statutes of this country, Attorney General Daugherty laid down his views of law enforcement and wound up with the statement that as long as he remained the nominal head of the Department of Justice the law would be enforced to the utmost of his ability.

His speech, in part, was:

"I know it is often said that this is the wealthiest and at the same time the more materialistic age in the world. That is true in a certain sense, but it is also true that the common wealth of the age as well as the sum total of individual wealth furnishes the opportunity for the achievements that have been accomplished. Our schools and colleges, our libraries, our homes of comfort, our means of transportation and communciation, and all our means of enjoyment of life, are physical conditions necessary for spiritual as contrasted with material upbuilding.

Conservation the Law of Supremacy.

The right of property on the one hand, of life, of liberty, of the pursuit of happiness on the other, are not antagoniste and hostile, to be set off in terms of opposition. Material wealth is the handmaid of spiritual achievement—that is, of intellectual, social and moral achievement. All progress is conditions on the principle of conservation. Conservation, or preservation as it is usually termed, of the wealth of the world, whether it be in the realm of the material or spiritual, is condition on the supremacy of the law. If there is one fact that history teaches above another ,it is that the rights incident to wealth and the rights furnishing the opportunity to enjoy spiritual, intellectual, moral and social things are conditioned upon the supremacy of the law.

The supremacy of the law, though challenged, is not undermined by the ordinary criminal who commits murder, robbery, larceny, etc. To the contrary, every occurrence of crime of this sort tends to impress upon society the profound importance of the supremacy of the law and its vigorous enforcement. The supremacy of the law is and has been challenged mainly in the class of legislation where there exists a difference of opinion as to governmental policy in enacting the legislation in question.

Suggest Old Methods.

Disrespect for law has manifested itself in the past mainly by large corporations or aggregations of wealth, commonly known as big business, and by labor organization in relation to such business. I am not much in favor of new nostrums and panaceas to cure the ills of the body politics, but I venture to make the following suggestions:

First, it is an undisputed fact that the public have a right to know what the quarrel is about in every actual or threatened strike or lockout, and similar controversies.

Second, there should be some definite agencies in government for ascertaining these facts fully and making an impartial finding by those specially qualified both by temperament and training to do this particular kind of work; and such finding should be reported so that it will be a reliable source of knowledge to which students and pubilcists and statesmen can resort.

Third, compulsory jurisdiction over those two factors to compel them to submit to an inquiry of this sort is not only desirable just just.

Fourth, at present our study of this questions has not been sufficiently thorough to warrant legislation compelling the acceptance of such findings by the parties thereto. Therefore, the jurisidction of the proper agency should be obligatory upon the parties to submit to the investigation; the acceptance of the finding by the parties should be voluntary.

Fifth, the experience of the past shows that in most cases full, accurate, reliable publicity has been sufficient to compel an adjustment of these cases. Public sentiment is a controlling factor, and it is important, in justice to both of the parties, that it should depend upon something more accurate than successful propaganda.

Sixth, in the course of time knowledge of the nature and causes of these controversies derived in this way may crystallize public sentiment to the extent that laws can be enacted making such controversies impossible.

Political Offenses.

I have been discussing acts and conduct as a basis for disrepect for law. I now turn to a consideration of several subjects that tend to create disrespect for law not by specific acts or deeds, but by attempts to justify the acts by certain theories of po-

GYPSY CARAVAN GETS THE COLD SHOULDER HERE

Three Truckloads Pitch Their Camp Near Hyde City But Are Ousted By Officials.

PROVED THEIR PERSISTENCY

Moved On To Clearfield Creek And Kept On Moving When State Copper Appears

Three truck loads of Gypsies who hit this section yesterday met with a very inhospitable reception. There were about twenty-five dirty, frowsy looking men, women and children in the outfit and when they attempted to pitch a camp at Hyde City, the director of public safety called out his police force and told them to move on.

They "moved on" as far as the grove along the bank at Clearfield creek and again started to pitch their tents. Corporal Novick and Chief Hitt drove out to the proposed encampment, found the Gypsies were without a license for Clearfield county and ordered them to move on once more and keep moving, on until they got across the Clearfield county line.

They silently folded their tents and on they went.

AUTOIST VICTIM OF PECULIAR ACCIDENT

Scalded When Steam Blew Cap Off Radiator Of His Machine.

Joseph Beaston, who operates a coal mine in Lawrence township, was painfully injured in a peculiar manner yesterday afternoon. He drove out to his mine in his automobile and noticing that the machine was pretty hot he stopped and began to take the cap off te radiator. When he loosened the cap it shot up into the air, the red hot steam striking him severely scalded him about the head, face and arm, causing serious and painful injury.

Local Motorist In Sunday Auto Wreck

H. B. Snyder, of Clearfield, and his mother-in-law, Mrs. Thomas Byron, of Philipsburg, were painfully injured in an automobile accident which occurred Sunday last. Mr and Mrs. Snyder and the latter's parents were automobiling over in Bald Eagle valley, when, in attempting to pass another car, their machine left the road and collided with a telephone pole. Mrs. Byron was thrown from the car into a barbed wire fence along the road and was very badly cut and torn. She is now a patient in the Philipsburg hospital.

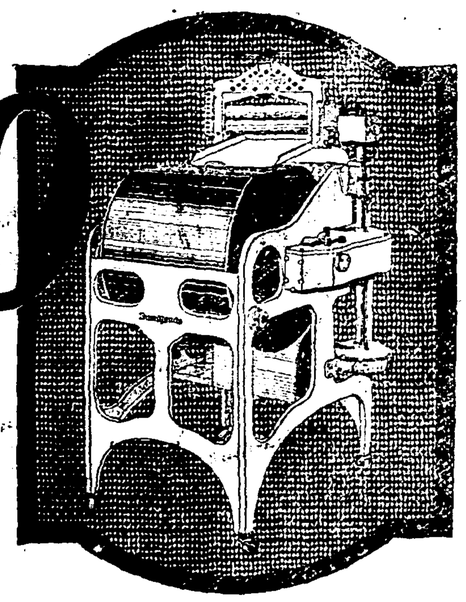

Mr. Snyder received two or three broken ribs and other bruises. Mr. Byron and Mrs. Snyder escaped from the wreck unhurt.

Body Of American Non-Com Recovered

Hull, Eng., Aug. 31.—The body of George Welsh, American non-commissioned officer, who perished when the ZR-2 fell in flames in the River Humber last Wednesday, was today recovered from the river bed where it was found jammed in the wreckage of one of the gondolas of the big airship.

Now Any One Can Own A Standard Electric Washer!!

$100

The all-metal, standard-capacity Sunnysuds selling for $100 is here! Its cabinet frame is built entirely of pressed steel—sturdy, rigid, open, and easy to clean.

Its six sheet copper tub is so designed that it washes the contents of the family clothes-basket with a thoroughness that is astounding and a gentleness that is pleasing.

The Sunnysuds swinging aluminum wringer locks firmly into four positions. Roll pressure and safety release are controlled by one lever.

Other exceptional features of design: sediment zone, faucet outlet, ¼ H.P. self oiling and self cooling motor, direct drive, enclosed gears, crown casters.

Come in at any time for literature or a demonstration. Everyone should see this remarkable washer selling at a remarkable price.

Health The Keynote To Beauty

Beauty means so much to women—power, social triumph, admiration and love. Beauty implies good health. Who ever saw a woman, racked with pain, struggling with weakness or disease, who could be called beautiful? The woman of today in this high-strung, nervous age is continually overdoing, with the result that ills peculiar to her sex develop which, unchecked will ruin all chances for her happiness. The natural restorative for such ailments is Lydia E. Pinkham's Vegetable Compound which for more than forty years has been recognized as a standard remedy for women's ills and has done much to relieve pain and restore good health to women.

"PEP"

One of the secrets of lasting youth is "pep"—and one of the most important builders of permanent "pep" is a daily bath.

When you come right down to reason, what is there to "discount" tires—

THE next time a friend comes to you all excited about some wonderful tire bargain—ask him how much *value* he ought to get for each dollar of tire money.

It's astonishing that any car owner today should not know all the tire service he is entitled to.

Nor how to check up between the economy of par quality on one hand—and big discounts, surplus stocks, discontinued lines and retreads on the other.

* * *

For two years U. S. Tire makers have been telling the American people all about tires.

They have laid open the tire business from every angle.

They have always led the fight for better tires.

They have consistently maintained quality *first* standards with certain economy for the tire buyer.

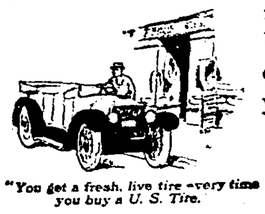

They have established 92 Factory Branches all over the country. Perfecting U. S. distribution so that you get a *fresh, live* tire every time you buy a U. S. Tire.

* * *

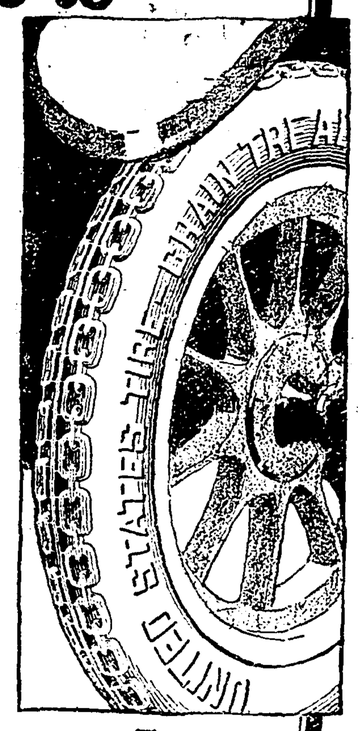

So when a man once decides on U. S. Tires he knows what he is getting in quality—service—economy.

In support of his *own judgment* he gets the pledged word and reputation of the largest and most successful tire concern in the world.

A sound reason for the fact that you see more U. S. Tires on more cars than ever this year.

"You get a fresh, live tire every time you buy a U. S. Tire.

The
U. S. CHAIN TREAD

One of the few tires of which it may be said that they deliver economy year in and year out and tire after tire.

EDWARDS MOTOR TRANSIT CO. Curwensville, Pa.

NEWS OF OUR NEIGHBORS

CURWENSVILLE

Joshua W. Sykes of Roaring Springs, Pa., was a town visitor this week. He is a tannery superintendent and it is said that he will be sent to this town to assume charge of Summit tannery when it starts.

A family dinner was given at the home of Mr. and Mrs. Ernest Post, at their home on South Pine street, at which a number of hosts were present and heartily enjoyed the hospitality afforded them by their hostess.

Mr and Mrs. W E. Tate, of Glendyn, Minnesota, are visiting in the home of Mrs. H. L. Burkett. They expect to remain several months in Curwensville and vicinity before returning to their western home. Mr. Tate is a native son of this county, but has resided in the West some time.

Prof. Norris desires us to once again impress upon the minds of parents who are starting their children this term for the first time to have them vaccinated before schools open and thereby save themselves, as well as the instructors, a vast lot of trouble. The law governing vaccination will be rigidly enforced in Curwensville schools this term, and all pupils who have not been properly vaccinated will not be accepted.

There are three empty store rooms in town at present, but investigation gleans us the information that all of them have been optioned.

A new barber shop has been started in the Grande house, next to Dr. Erhard. The new man has lowered the price of hair cutting from 50 cents and shaving from 20 cents to 15 cents. He is commanding quite a trade and has been operating only two weeks.

Through the courtesy of Dick Lantz, the writer was given a nice, smooth automobile ride to the county seat yesterday forenoon. Many interesting scenes bobbed up as we went along, slow enough to allow us to count the telephone poles for one thing, which could be written up very interesting had we the ability and inclination to do so. However, it was noticed that a half dozen State constables were scattered along the line, ostentatiously viewing the scenery, but in reality taking numbers of auto cars which were making a track speedway of the road. Some good, stiff fines would tend greatly to bring these speed hogs down to a realization that others have the right to travel this highway as well as they.

Chief Clark is determined to enforce the new car parking rule if he has to remain on duty day and night. He will carry out his instructions to the letter. Watch him.

Howard Addleman, only son of Mrs. Samuel Addleman, South South, and whose home is in Seattle, Wash., arrived in Curwensville Friday for a month's visit with his mothe rand sisters. He is employed in the U. S. postal service.

A number of blackberry pickers stirred up a den of rattlesnakes near Bear Run yesterday afternoon. Sixteen or twenty of the reptiles were slaughtered, and a number succeeded in escaping in the brush. It is estimated that there were nearly one hundred snakes in the bunch.

Two dances are advertised to take place in Curwensville, one a square dance on the evening of August 30th and the other on evening of September 1st, a round dance. Smith's orchestra will be on hand at the first and Maurey's orchestra will furnish the music on the second occasion.

WOODLAND

Mr. and Mrs. Stanley Ford of Port Jarvis, N. Y., are visiting at the home of Samuel Stone at Mineral Springs.

Mr. and Mrs. Herman Palmer of Clearfield spent Sunday at the home of Jno. Palmer at Mineral Springs.

Mr. andw Mrs. M. A. Peters spent Sunday at the home of Mrs. Peters' mother, Mrs. Triphena Riley, at Tyrone.

James Henchliffe and son James Jr., went to New York on Saturday evening where they will meet relatives coming from England.

Fred Herbert and family spent Sunday afternoon and evening with relatives in Munson.

Mrs. V. G. Henderson and Miss Gean Soult of the U. B. Sunday School and Misses Lydia Owens and Irma Pickles of the M. E. Sunday School are attending the Sunday School convention at DuBois Tuesday and Wednesday of this week.

Mrs. Robert Heberling and son Jack of Tyrone are visiting relatives here this week.

Stanley Woolridge of Philadelphia is visiting his mother, Mrs. Sarah Woolridge.

W. A. Develingf has purchased a new Paige car.

SHAWVILLE

Sunday school at Goshen 10:00 a. m. Archer Read, superintendent, wants to see a full attendance.

Don't forget the date Saturday, Sept. 3, the chicken supper at Egypt.

Shawville Sunday school will convene at 10:30 a. m. Mrs. Joseph Kyler will superintend the school.

Roy Watson was a caller on Sunday at the William Rich home.

Mr. and Mrs. Ray Wilson are the proud parents of a bouncing boy baby. Mother and child are doing nicely.

Mrs. John Wood of Clearfield is a week end visitor at her sister's, Mrs. Mearl Kyler.

The kind hearted people in the grove meeting gave Rev. P. J. Mahan, the evangelist in his free will envelopes, $30 for the services rendered while here.

Grease Spots on Wallpaper.

To clean wallpaper of grease spots, buy an ounce of pipe clay at any drug store and make a thick paste. Apply to the spots and allow to remain on over night. In the morning rub off with a clean cloth. It makes the paper like new, removing all the spots.

Evidently Did Not Fear Washington.

David Burns owned the farm on which the executive mansion and many department buildings now stand at Washington, a thrifty Scot, who objected to giving the land for Lafayette square. When Washington reminded him he would have been a poor tobacco raiser had the federal government not chosen his farm, he replied that but for a fortunate marriage Washington would have been an ordinary surveyor, but Washington got the land he wanted.

DuBois, Indiana, Punxsutawney

THE SCIENCE OF CHEMISTRY, mechanics, and electricity all enter into the production of a storage battery, so you must realize why it needs careful attention and the importance of keeping it fit. If your battery is run down and exhausted, we will re-charge it. We will bring it through to a vigorous old age by regular care and at a moderate outlay.

GRAY STORAGE BATTERY COMPANY,
101 Locust St. Clearfield, Pa.

First Really National Bank.

Bank of North America was the name of the first bank of a national character. It had a charter for ten years, from 1741, from the confederation, but doubt as to its legality led the bank to seek and obtain a charter from the state of Pennsylvania in 1783. In 1785 this latter charter was revoked, but in 1787 it was renewed. It was located at Philadelphia.

Lancaster Pike First Turnpike.

The first turnpike in the United States was constructed between Lancaster, Pa., and Philadelphia.

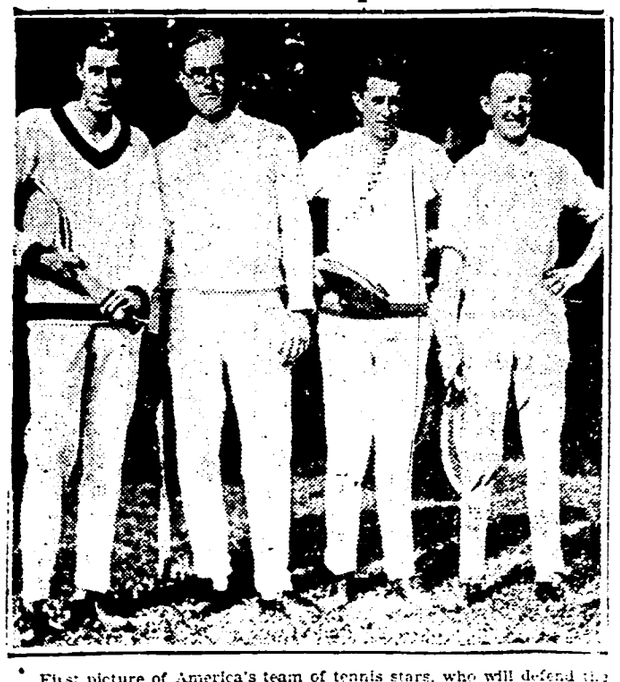

Cathedral of Mud and Wood.

Of the world's cathedrals, probably the most curious is that which crowns a hill in Uganda. In appearance it resembles nothing so much as a mountain of grass, although on closer inspection one is able to see that mud and wood have been extensively employed. The structure can accommodate 4,000 persons.

The Latter of Human Kindness, Eh?

English Paper—Plain cook wanted for the country. One who can milk a cow and a Christian preferred.—Boston Transcript.

Our Davis Cup Stars

First picture of America's team of tennis stars, who will defend the Davis cup on the courts of Forest Hill, L. I., Sept. 2, 3 and 5. Left to right, W. T. Tilden, Watson M. Washburn, R. Norris Williams, 2nd, and W. M. Johnston.

ODDS AND ENDS AND THINGS

"By Skinney"

Peter Kelley, aged 65 years, and a resident of Flat Rock, Centre county dropped into Philipsburg Friday last and enjoyed the luxury of his first shave at the hands of a barber. Up to this time Peter had been doing his own shaving and the women of the family placed a crock on his head and cut his hair around it very religiously twice each year.

Chili has at last been bit by the "dry" bug and a movement is on foot to make the country dry just for the working man. The committee appointed to investigate the situation says:

"We find that the educated classes drink moderately and with gentility but when the workers drink they become intoxicated. Then they fight and kill each other. So we think prohibition is a good thing for them and believe we shall try it out."

It was the same spirit or idea that made the U. S. A. "dry". Let them go to it.

* * * *

'TAINT CLUBBY, YOU KNOW

Henry Ford is having as hard a time to reduce freight rates on his own railroad as he had getting the boys out of the trenches before Christmas, once upon a time. The other railroad executives think Henry's efforts to reduce freight rates is far from being "clubby" and the government officials in charge of such propositions appear to be of the same mind because for the third time in as many weeks the Interstate Commerce Commission thwarted efforts of Henry Ford to reduce rates on his railroad.

Proposed reductions on coal carloads from mines on the Detroit, Toledo & Ironton Railroad to Detroit Michigan, and other destinations on the same line in Ohio and Michigan were ordered suspended from September 3 to January 1, 1922.

The rates averaged 50 per cent reduction per net ton.

* * * *

LOTS OF THINGS WORSE THAN FARMING

"Life down on the farm" is not as onerous as it was in the old days, according to figures made public by the Census Bureau, showing the number of farms that have modern conveniences such as automobiles, telephones and electric light. In 1920, 1,979,564 farms in the United States had automobiles, the number of cars being 2,146,512.

Motor trucks were reported on 131,551 farms in 1920. The number of motor trucks on these farms was 139,169, with Pennsylvania leading with 9,272.

* * * *

Secretary of Commerce Hoover is not in favor of nationalization of the coal mines but he does favor a national coal exchange.

He says:

"If there could be a free market created without speculation, I think it would be a good thing for the industry and for the country generally."

Trade exchanges of other commodities have proved of great public benefit, he contiued, and with no central point now available for coal marketing an exchange has become almost a necessity.

* * * *

A Chicago woman wants a divorce from her husband on the grounds of pernicious and long continued excess kissing. The poor woman said hubby was such a kissing bug that she lost 44 pounds the past twelve months putting up with his osculatory excesses. We don't notice many Clearfield women falling away from such a cause.

* * * *

SHE OUGHT TO GET IT

Mrs. Helen Lichfield, a South Glen Falls, New York, woman, has brought suit against a doctor in which she asks for $10,000 damages on account of a little error the physician made. The doctor in question has a brother who is also a physician and both were operating at a Glen Falls hospital. Mrs. Lichfield desired to have a tumor removed from her breast by Dr. Arthur Chapman, but when she was wheeled into the operating room she was announced as Dr. George Chapman's patient and as Dr. George was waiting to remove his patient's appendix when the woman with the tumor came along he cut right into her and removed her appendix. Now the poor woman has to wait until she recovers from the appendicitis operation before she can undergo the operation she was scheduled for and she wants $10,000 to comfort her for the double ordeal. Can you blame her?

Aldrich's Critic.

"As time went on," says Ferris Greenslet of Thomas Bailey Aldrich "he was growing increasingly fastidious in the revision of his prose, and in the end he smoothed and filed it with the same loving, lingering care that he bestowed upon his poems. As he wrote in one of his letters: 'There is only one critic I stand greatly in dread of; he becomes keener and more exacting every month; he is getting to be a dreadful fellow for me, and his name is T. B. Aldrich. There is no let up.'"

Leader Feels His Power Gone.

In full health a stag is always proud of his ability as leader and champion and waves his gleaming flag boldly, signaling to his family that way. Hit him with a bullet, and down goes his flag instantly. He will save himself if he can. But he does not wave on the others to follow him. Scatter and save yourselves, he would say.

No Man Always Right.

The man who is always right does not live. He is still the prospective product of the development of the species. Even the one who generally thinks he is right will be found frequently to draw wrong conclusions but he's safer to follow.—Grit.

HOUSE OF DAVID FALLS BEFORE THE TERRIERS

Long Haired Visitors Are Shut Out By Locals In Tuesday Game

The House of David baseball team was the magnet which attracted twelve hundred people to the driving park yesterday afternoon. The "bearded giants" met the Clearfield Terriers in a snappy game which was good to look at and resulted in favor of the home team by the score of 2 to 0.

No Scores After First.

The Terriers scored their two runs in the first inning and after that time not a single runner crossed the plate for either side.

Wolfe, despite his name, was on the mound for the vegetarians, and after that first session veritably "ate 'em alive." He allowed but seven hits and but thirty men faced him.

Spiers, first man up, was hit on the foot by the pitcher. Callahan tripled to right, scoring Spiers, and a moment later came home on Getz's sacrifice fly back of second base. But six hits were made off Wolfe in the remaining seven innings.

Fileshifter Pitched Well.

Fileshifter held the whiskered fellows scoreless throughout the nine innings with but very little effort and was easily their master at every stage of the game. He was also given faultless support by his teammates, Zerfluh being an especially capable performer in the field.

The score:—

Clearfield	R	H	PO	A	E
Spiers, ss	1	1	1	0	0
Callahan cf	1	1	3	0	0
Getz 2b	0	1	1	1	0
Harris 1b	0	1	8	0	0
Hoffman lb	0	0	1	0	0
Crossin lf	0	0	1	0	0
Zerfluh 2b	0	1	2	3	0
Hopper c	0	1	9	0	0
Fileshifter p	0	1	1	2	0
Totals	2	7	27	6	0

House of David	R	H	PO	A	E
Falk c	0	1	0	0	0

With the opening of school rapidly drawing near, youngsters all over the state are anxiously awaiting the ringing of the school bell next Tuesday morning. Which leads us to the remark that the kids spend the entire summer vacation waiting for school to start, and then pass the whole school year anxiously looking forward to the last day of school and the first day of vacation. Such is the cycle of life of the youngster.

Chicago reports a big shortage of school teachers. Whether the feminist movement is responsible for this condition is not explained, but is said that the lack of teachers has forced the Chicago schools in many instances to work on the "two shift" plan. Inducements to enter the business world are claimed responsible for girls deserting teaching for better paid positions in business.

Evidence of the plight of unemployed service men was carried to cultured Boston, Massachusetts, last week, when Armand T. Gaudreau, University of Maine graduate, besought the American Legion employment bureau for any work that he could do. Previously Gaudreau, dressed in his collegiate cap and gown, appeared in the streets of the banking section, selling newspapers.

LAW ENFORCEMENT

Attorney General Daugherty's address before the Ohio State Bar Association at Cincinnati today is brimful of truth. Most salient is his assertion there is nothing wrong, fundamentally, with the laws of this country, but the attitude of many, who are potential law breakers, and officers who fail to do their sworn duty, is causing the greatest part of the wave of disturbance that is passing over the country today. Most agreeable is his announcement that as long as he heads the Department of Justice, he will do his utmost and call on the full powers of the government to back him in his fight to uphold the laws.

There is too much crime in this country today. Never before has it appeared so widespread as in the last few months. People have too little respect for the law. Is it due to the fact that too many reform laws are being passed to hedge the activities of the average citizen? One generally has a profound respect for the law as long as it does not tramp on one's toes. When it does, and laws are passed that seem to take away some of our personal liberty, are we too wont to be the victims of a mental rebellion, and in our anger belittle the advisability of such statutes?

Conservation of property, life and liberty is the basic aim of all laws. To have these laws enforced, they must be respected. It would seem that a campaign to make our laws respected and thus better enforced, would be the better thing right now.

On the other hand, THE PEOPLE are responsible for every law we have. Our laws are not the edicts of kings or emperors, but were selected, passed and made valid by representatives of the people. Until the people effect a repeal of any such law, it should be enforced to the last crossing of a "t" or dotting of a "i." As long as it not repealed by the people, it should be considered the will of the majority, and as such fully respected.

President Harding, in a campaign speech, summed up the entire situation when he said:

"No true American will argue that our laws should not be enforced. I refer to laws, no matter of what nature, whether they be those which deal with ordinary crimes and misdemeanors, or those which deal with acts of treason to the United States, threatening to the Constitution and the fabric of our social organization."

Wanted to Know Papa's Status.

Little Freddy at the breakfast table, after having tucked away one piece of cake, turned to his father and said, "May I take another piece of cake, papa?" Father, with years of training to his credit, answered, "You'll have to ask mamma about that, Freddie." Whereupon sonny piped up, "Haven't you anything to say at all, papa?"

Human Weights.

A woman, forty-three years old, five feet five inches tall, should weight 143 pounds, and a man forty-eight years old, whose height is five feet seven inches, should weigh 156 pounds, according to a table compiled by the Association of Life Insurance Medical Directors and the Actuary Society of America.

The Uninformed.

At the height of the Derby fever in London two men were arguing on a literary subject on the top of an omnibus: "Well," said one, "John puts 'Bleak House' first and 'Martin Chuzzlewit' second." A hoarse voice interrupted from the seat behind. "Gentlemen," it said, "I don't know your pal John, but you're bein' had. There's no such horses runnin'."

Corncob Has Real Value.

The lowly corncob can be made into many useful articles, due to a set of discoveries made in the bureau of chemistry of the Department of Agriculture. After a high-grade adhesive is removed, pure cellulose, a very good quality of paper, and valuable lime products are recovered from the residue.

The Function Of The Commercial Bank

Commercial Banking is the foundation of all banking. For the chief aim of modern banking is the is the fostering of industry and business, and that is the special sphere of the commercial bank.

Large industries canont exist in a community without large banking facilities. The commercial bank serves its community in proportion as it fosters her industries.

The County National Bank is the oldest commercial bank in this section of the State.

It invites accounts of all classes and of all sizes.

BUSINESS AND TRADE

News of Local Interest
With Special Attention to Coal, Clay and Brick Trade

WHOLESALE PRICES TENDING TO STABILIZE

"There is evidence that general wholesale prices are tending to become stabilized. Bradstreet's index for August 1 showed an increase of 3 per cent. over July 1, which is the second consecutive increase in this index. Dun's index rose 2.4 per cent over July 1 and that of the Federal Reserve Board 1.4 per cent., while the Department of Labor's all-commodity-index was the same for July as for June.

"On the other hand, the maladjustment of prices of many commodities relative to other commodities noted in earlier numbers of the Guaranty Survey continues, although there is a definite trend toward normal relationships. The prices of some basic commodities such as copper, tin, hides, cotton and tobacco are well below pre-war averages, while the prices of others, such as bituminous coal, brick and lumber, are well above.

"The malajustment in the prices of imported raw materials is even more pronounced, silk being far above and rubber far below average prices in 1913. In general; farm products and raw materials are close to or below pre-war levels, while manufactured goods on the whole are considerably above. Stabilization of prices at some level in accordance with their normal relation one to another, however, is more to be desired than their return to any particular former level.

UNEMPLOYMENT IN THE UNITED STATES

The estimate of the Secretary of Labor that 5,735,000 workers are now out of employment, while based on comparisons with the number employed at the height of last year's prosperity, shows the seriousness of industrial conditions. Owing to the mobility of labor, the seasonal nature of much production, and the fact that our economic system is never in perfect adjustment, there is at all times a certain number of unemployed ,which a statistical study shows averaged in the years 1902 to 1927 about 3,400,000 in midwinter and 1,900,000 toward the end of the harvest season. Nevertheless, even when allowance is made for the unusual basis upon which the Secretary's estimate is made, it is seen that unemployment is much above normal, and it may increase as the season advances and harvest hands return from the fields.

In spite of unfavorable weather during July, the Government Crop Report of August 1, showing an estimate yield for all the grains of 5,131,000,000 bushels, compared well with the average yearly production for the seven years 1913-1919 inclusive, of 5,169,520,000 bushels. The estimated cotton yield of 8,203,000 bales, due largely to restricted acreage ,is far below the seven-year average of 12,528,000 bales, as also are are the estimated tobacco yield of 889,000,000 pounds, compared with an average of 1,192,428,000 pounds, and the estimated potato yield of 316,000,000 bushels, against the average of 371,123,000 bushels. These estimated yields are all considerably short of the 1920 production, which established records for several crops, but they are being produced at considerabbly lower cost than last year's crops. The progress of general business revival will depend largely on the prices which the farmers will receive for this years' crops. The prices for farm produce which normally rise a little in July, increased by slightly larger amounts this year than is usual.

ATTORNEY GENERAL

Contiued from Page 1

litical philosophy. And of these, the first is the doctrine of so-called political offenses.

Political offenses is a term, as you know, of international law used to denote certain classes of offenses which are excepted from the operation of treaties of extradition between States. The offenses comprehended under this term for which extradition will not be granted are usually those involving matters pertaining to civil, religious or political liberty. The state in which the fugitive has found asylum frequently reserves to itself the right to refuse to surrender such fugitive on the ground that it is one of the excepted cases under the extradition treaty. The principle is that two sovereign states do not necessarily have the same civil, religious or political standards of liberty; that one nation may abridge liberty and prescribe penalties for doing certain forbidden acts, which abridgement is utterly opposed to the fundamental political philosophy upon which such other nation exists.

In this country there is now being disseminated an extensive propaganda to dignify the crimes committed by many persons who are now in prison for disloyal conduct or for obstructing or hindering the Government in prosecuting the war with Germany, and, by means of such propaganda, to create a public sentiment not only to have such criminals freed, but to have this general doctrine of political offenses recognized as a part of our domestic law, the purpose being, when the doctrine is once recognized, to enable criminals and those in sympathy with them to continue such opposition to law and order with impunity.

No Excuse Here

There might have been some excuse for the recognition of such a doctrine in the schisms and controversies, rebellions, revolts, and revolution of the old world, whose history has been in some states one continuous struggle between the arbitrary exercise of tyrannical power on the one hand, and the just fight for civil, political or religious liberty on the other. Again, no organ of government existed in many of these states for the sovereign will of people to express itself. Hence, revolution, rebellion, revolt, and feud within the state were the agencies that necessity compelled the mto invoke in order that the spirit of liberty and democracy might express itself.

The question of the limitations of personal liberty is, in the first instance, a question of political philosophy and not of law. In the evolution of government we have gradually limited the sphere of individual liberty. A study of the history of legislation wherein personal liberty has been limited by statute will show that these enactments have been vigorously challenged; and the same arguments have been used against violation of personal liberty that we hear today.

Only View That Of Enforcement.

From the standpoint of the Government, the only sound view is that of law enforcement. Whatever differences of opinion exist in the views as to the wisdom of some of these laws can be of no concern to the agencies for law enforcement. The Executive Department cannot make the laws. It is equally true that it cannot nullify laws. To refuse or to neglect to enforce a valid enactment of the legislative department of government, or to enforce it mechanically or half-heartedly or to wink at its violation, is without justification on any sound theory of government. Those who ask it or expect it not only contribute to lawlessness but destroy the basis upon which their own security rests. Our safety and happiness lies in obedience to law by every man, woman and child within the domain of our Republic, and no one can undermine respect for law without being, to that extent, an enemy to law and orderly government.

I am opposed to any system of government in which the rights of any individual or group of individuals depend upon the whim or caprice or temperamental attitude of any public officials.

If any citizen dislikes the law under which he is living, his relief is thru the legislative department of government, and not through those who, under the constitution, have the sworn duty of enforcing the law. As a citizen cannot choose what laws he will obey, so, likewise, those charged with law enforcement cannot choose what laws they will enforce. The only sound position for those who favor respect for law to take is that those charged with law enforcement must enforce all the laws, and all good citizens must obey all the laws; neither can exercise any right of choice in this matter without placing themselves above the law. It is the part of faithful officials to enforce and the part of good citizens to obey them.

America For Americans.

It is the duty of the minority as well as the majority to obey the law. My experience in the last few months as head of the law enforcing department of the Government has carried to me the conviction that these things sould be said to the general public.

If laws are obnoxious to the people it is their province to repeal them. Until they are repealed they must be observed and enforced without fear or favor.

The Government will endure on the rock of law enforcement; or it will perish in the quicksands of lawlessness.

Those who do not believe in our government and the enforcement of our laws should go to a country which gives them their peculiar liberty.

To those who come to our shores to take advantage of American opportunities it is becoming to wave the hand of welcome. But it is our duty to warn them to stay away unless they intend to observe our customs and obey our laws.

My duty is clear. As long as I am the responsible head of the Department of Justice the law will be enforced with all the power possessed by the government which I am at liberty to call to my command."

BUSINESS AT BELL'S LANDING

The coal mines of the Good Coal and Clay Company, after having been shut down the greater part of the summer, began work Monday morning, Aug. 29th with a full crew.

The Pennsylvania Coal and Fire Clay Corporation expects to be ready to ship coa lin a few days. Under the the able management of R. L. Derrick, the work has been going along very nicely.

The Harbison-Walker clay mines are still idle, with little sign of operations starting before the first of the coming year.

A ne wcoal company has been taking up some acreage in this vicinity and it is rumored that they expect to begin operations this fall.

Pests Able to Travel Far.

Investigations have shown that certain kinds of malaria-bearing mosquitoes can fly over four miles.

Books and Friends.

One cannot celebrate books sufficiently. After saying his best, still something better remains to be spoken in their praise. As with friends, one finds new beauties at every interview, and would stay long in the presence of those choice companions. As with friends, he may dispense with a wide acquaintance. Few and choice. The richest minds need not large libraries. That is a good book which is opened with expectation and closed with profit.—A. Bronson Alcott.

Would Be Worth Seeing.

In the geometry class a difficult problem arose. The teacher informed the pupils that he would put it on the blackboard and explain it. After carefully and tediously working on the diagram he addressed the class thus: "I want every one in this class to watch the blackboard now as I run through it."

"Bonanza" Signifies Good Fortune.

"Bonanza" is a Spanish word meaning "fair weather" or a "favoring wind." It is used in mining districts to signify an abundance of precious metal or rich ore. The miners of Comstock Lode, a wonderful gold and silver mine in Nevada which yielded 340 million dollars worth of ore in thirty years, first used "bonanza" in this way. The word is now also used to signify any good fortune or successful enterprise.

China Clay.

China clay is nothing but decayed granite and much of it is dug up from pits in Cornwall, England. It is mixed with water and run into a series of ponds, where the heavy impurities sink to the bottom, leaving a thin paste of fine clay. When this settles it is dried into bricks, ready to go to the potteries.

THE GRANARY

A Column of News and Timely Topics for the Man Wh Feeds the World

FARM CALENDAR

Farm Practice—Remember to seed wheat a week to ten days later than is customary in your locality to obtain the best control over the Hessian fly.

Machinery—See that machinery for seeding wheat, cutting corn, filling silos and digging potatoes is all in good working order. One cannot afford to delay the work by having to wait for a machine to be put in order when the time arrives to do this work.

Forestry—If you are dissatisfied with the crop of weeds and briars now showing up at their best on abandoned hilly farm land, plan to plant forest trees on it next Spring.

Poultry—The Fall markets are usually very good for fat hens. Any birds that are not going to be profitable to keep over the winter should be disposed of now. They should be fattened about ten days before shipping. A wet mash with plenty of corn chop and milk together with restricted exercise will do the trick.

Dairy—The dairy cow is the farmer's best bet. With grain and livestock markets on the decline, the butter market shows an upward tendency. The price of dairy products shows less fluctuation than other agricultural products.

Feeding New Oats—Begin to feed new oats gradually, mixing them with ol doats or corn. After the horse becomes accustomed to them there will be no danger from illness.

Garden—String beans too old to snap will make good seed. Do not save pods showing disease spots as they will mean seed unfit to plant.

Grain Moth—Bins showing the presence of grain moth should be well fumigated with carbon bisulphide spray.

SEPTEMBER WEATHER

In most sections of the country September is usually considerably cooler than August, but with some high temperatures, especially between the Rocky Mountains and the Mississippi River. Temperatures of 100 degrees or slightly higher have been experienced in this area, but to the east of the Mississippi River only a few stations have records as high as 100 degrees in September. Cool weather may also be experienced during this month; in fact, killing frosts have been known near its close as far south as Oklahoma and Tennessee. The average date of the first killing frost in fall in the Dakotas, Minnesota, northern Wisconsin, and the interior Northeast ranges from September 15 to 25.

Rainfall in most districts east of the Rocky Mountains is appreciably less in September than in August, but in a fe winstances it is somewhat greater. In New Mexico and Arizona precipitation is lighter, but in the northern Pacific coast sections there is usually a marked increase in rainfall during this month, the averages ranging from 4 to 6 inches, against 2 inches for the preceding month.

Personal Charm.

Unselfishness is one of the keys to personal charm, which means good manners. The woman who would be a successful woman, a woman of charm, must be an unselfish woman. She must be unselfish in her own interests. She must repress natural instincts to be bad-tempered when she is tired, to retort sharply when contradicted on her own particular subjects. She must listen when she wants to talk, and she must never for one moment be off her guard in the world.—Exchange.

All Due to the Women.

In a lecture before the Royal Institute, Prof. Arthur Keith, an eminent biologist, gave the credit for American success to the women who came over with the Pilgrim fathers. The fact that these Englishmen brought their wives with them is responsible for the remarkably sturdy condition of the American people; whereas the Spaniards who went into Central and South America left their wives behind, and the result is a hybrid race which is not the equal of the original Iberian.

Seek Employment Worth While.

Let your employment be such as may become a reasonable person; and not be a business fit for children or distracted people, but fit for your age and understanding. For a man may be very idly busy, and take great pains to so little purpose, that, in his labors and expense of time, he shall serve no end but of folly and vanity. There are some people who are busy, but it is, as Domitian was, in catching flies.—Jeremy Taylor.

Pleasant Walks and Talks.

These nice Sunday walks, when two friends get to know one another so intimately; these Sunday-evening talks, when you gather by twos and threes in the firelight, and talk so freely; oh, what a power they are for good, if used aright; what a power for harm, if wasted or misused! No one wants you to force the conversation into an edifying channel; but one knows how to talk bifurcates, as it were, and how often there is a choice between high and low, wise and foolish, kindly and unkindly.—Elizabeth Wordsworth.

JIGGS AND MAGGIE WILL ENTERTAIN THEATRE GOERS

Realizing that a popular subject requires much more than a popular interpretation, the unusual is once more manifest in the latest triumph, "Bringing Up Father In Wall Street," the effervescent three-act musical comedy, based on the ever-green and always welcome cartoons of the same name, will be the next attraction at the Driggs theatre Thursday. It is a different sort of entertainment and built on lines not in common with the conventional or ordinary offering. It contains a really absorbing plot with a plentitude of esparkling tunes, melodies, features, screams, mirth-provoking situations, surprises, novelties, and is on the whole genuinely funny and irresistibly enjoyable. The laughs are incessant, yet the result of natural sequence and continuity. Those familiar with the characters in the cartoons of course know or have heard of Jiggs Mahoney.

Jiggs is undoubtedly the most beloved Irishman on the stage today. Not the exaggerated, burlesque type one has been accustomed to see in the past. But a regular human being, right from life, who knows how to enjoy himself even in the face of the shrewish attempts of Maggie, his wife, who attempts to will otherwise. Jiggs has been entrusted with another good role this time and he may be expected to enthuse and amuse his million of admirers and friends as he has in the past. Lest we forget—there is Dinty Moore, Jiggs' pal and body-guard; Clarence, Jiggs' nephew, who now has become a lawyer, and the rest of the Mahoney clan whose vagaries and adventures hold welcome space in the dailies and periodicals of our glorious country almost day in and day. What would be America without Jiggs. And what would be Jiggs without the United States? Both are an institution. So say all of us as long as they both are extant there should be no use for a League of Nations! This unique and extraordinary production comes here from Altoona.

Gossip for Tonight's Tea Table

R. C. Rudberg of Lanse left Tuesday to return to college. He is a student at Upsala College and is returning to complete his sophomore year there.

Word was received Monday by J. K. Sloppy, of New Millport, that the body of his son Ivan, a Clearfield county hero of the World War, had arrived at Hoboken.

Dr. Stork left a fine big boy baby at the home of Mr. and Mrs. Judd Carns at 10 o'clock yesterday morning.

THE KITCHEN CABINET

(©, 1921, Western Newspaper Union.)

To work, to help and to be helped, to learn sympathy through suffering, to learn faith by perplexity, to reach truth through wonder; behold! this is what it is to prosper; this is what it is to live.—Phillips Brooks.

WHAT SHALL WE HAVE TO EAT?

To have variety, economy and a well balanced day's meals, means careful thought and planning.

Fillet of Lamb.—Remove the bone from two pounds of lamb cut from the fore quarter, cut the meat in strips and pound until flat. Mix three tablespoonfuls of olive oil with three tablespoonfuls of vinegar and two tablespoonfuls each of minced onion and parsley. Pour the dressing over the meat and let stand over night. Serve browned in a hot pan. The bones may be cooked with vegetables making a fine soup.

Raisin Brown Bread.—Take three cupfuls of yellow cornmeal, one and one-half cupfuls each of graham flour and white flour, one cupful of molasses, one and one-half teaspoonfuls of soda, one-half cupful of hot water, one teaspoonful of salt, three cupfuls of sour milk, one or two eggs and one and one-half cupfuls of raisins. Mix well and fill molds half full. Steam three hours or six in a fireless cooker, reheating once.

Chocolate Loaf Cake.—One cupful each of sugar and sour milk, one teaspoonful of soda, two cupfuls of flour, two squares of melted chocolate, one well-beaten egg, one-fourth teaspoonful of salt and one-half teaspoonful of vanilla. Beat well and bake in a loaf forty minutes. This cake, if slightly less flour is added, makes a good layer cake. Put together with boiled frosting.

Tomato Fritters.—Beat one egg, add one-half cupful of water or stock, one-half teaspoonful of salt, one-quarter of a teaspoonful of pepper and one tablespoonful of finely minced parsley. Add two cupfuls of flour sifted with three teaspoonfuls of baking powder. Beat the whole together, then add two or three fresh ripe tomatoes peeled and cut in pieces, or one cupful of canned tomatoes and two heaping tablespoonfuls of grated cheese. Cook by spoonfuls in butter and serve with a highly seasoned tomato sauce as an accompaniment to roast meat.

First Fall Millinery Opening
Thursday, Friday and Saturday, Sept. 1st 2nd & 3rd

If perchance you imagine that early Fall Hats are freakish just visit our Autumn Millinery display. Never have Hats been more becomingly or attractively fashioned than this Season's modes. They show very delightfully that the artistic designers may introduce the most startling innovations without anything bizarre or extreme even creeping in. Novelty of contour produces interestingly irregular shapes and new trimming effects are no less unexpected. Bristling quills, swooping feathers and jaunty ribbons are favorite garnitures.

All are cordially invited to this first showing.

ELIMINATION SALE
of All Remaining Spring and Summer
Coats, Suits and Summer Wash Dresses
Begining (today) Wednesday and Ending Saturday

This is the greatest sale of coats, suits and dresses that was ever held in Clearfield. It is our policy to never carry over garments from one season to the next, hence these give-away prices.

Extra Charge for Alterations

ALL SALES CASH

Mingo Mine War Resumed At Dawn Today

MINE WAR BATTLE RAGING TODAY NEAR LOGAN

Hostilities Take On An Active Form. Both Sides Get Heavy Re-Enforcements.

SITUATION "NOT VERY HOPEFUL"

Casualties Reported In Morning Battle—Ohio Miners Reported On Way To Scene.

Washington, D. C., Aug. 31.—President Harding has drawn up a proclamation of martial law for the coal mine war area in West Virginia, Secretary of War Weeks announced today.

Battling Near Crooked Creek.

Charleston, W. Va., Aug. 31.—Miners and deputies are battling near Crooked Creek, below Logan, according to official advices received by Governor Morgan here today. One man has been killed and one taken prisoner, the advices reported. The victim was said to be a miner.

Major Thompson, returning here this afternoon after an investigation in the trouble zone, said the situation was "not very hopeful."

Battle Planes Spread Proclamation From the Air.

Logan, W. Va., Aug. 31.—Battle planes soared over Boone county early today showering down upon the masses of armed miners lying behind the ridge dividing Boone and Logan counties copies of the Proclamation issued yesterday by President Harding, calling on them to disperse.

Logan county's first line of defense, twenty miles long, up and down the valley of the Guyandotte river, bristled with rifles today as hundreds of armed voluteers poured in from other points to strengthen the forces that will bear the brunt of the assault if the miners attack.

Major C. F. Thompson, U. S. A. and two representatives of the United Mine Workers, arrived here today from Charleston by special train with copies of President Harding's proclamation which they will carry personally through the miners' outposts in the hills. They will make a final personal appeal to the miners to avert the disaster which is almost certain to follow their failure to comply with the proclamation, and disperse.

Deputy Sheriff Killed

Logan, W., a., Aug. 31.—John Gore a deputy sheriff, was shot and killed during the battle at Blair this morning. Miners attacked the town charking up the mountanside were reported repulsed by the Logan first line defense guard. Col. Wm. Eubanks, in command of the state forces, has appealed to the governor for re-enforcements.

Ohio Miners Join In

Madison, W. Va., Aug. 31.—Armed miners continued to pass through this town today on their way to the mobilization camp of the miners near the Logan-none county line.

When they arrived here they were told that President Harding had issued a proclamation requesting them to return peaceably to their homes. They shrugged their shoulders indifferently and continued on their way.

No action was contemplated today by C. & O. railroad officials against the miners who last night seized and manned a train on the Blanch Rock branch line road to transport miners from the Coal River valley to Jeffrey, where they joined the ranks of the union "army." The train was returned to the yards this morning in time to make its daily run.

Hundreds of miners were reported entering West irginia from Ohio to join in the attack. The number of miners was estimated this morning at 3500.

Misses Bertha and Olive Renaud of Keewaydin are spending today in town.

Bloody Wednesday Dawns With All Berlin On Edge

Berlin, Aug. 31.—"Bloody Wednesday" dawned with all Berlin on edge with anxiety. Speculation as to whether fresh bloodshed would result was incited by the excited feeling of a hundred thousand workers gathered here to participate in the demonstrations.

The morning passed peacefully, with "Safety" police out in great numbers, refusing even to permit verbal arguments in the ranks of the marching workers.

Chancellor Wirth was heavily guarded today following repeated threats that he would be assassinated before nightfall.

RAIL WORKERS VOTING FAVOR BIG WALKOUT

Returns Available At Many Rail Centers Against Wage Cut. Strike A Possibility.

Chicago, Ill., Aug. 31.—Members of the three large union organizations of rail workers are voting overwhelmingly in favor of a strike rather than accept a cut in wages according to information gathered by the United Press today at large railway centers.

The vote of trainmen, clerks and shop workers, being taken with other railroad organizations on the proposition of accepting a 12½ per cent. cut in wages or "leaving the service of the companies," strongly favors a walkout if further negotiations with railroad managers are unsuccessful.

Brotherhoods Voting On Strike Issue.

Cleveland, Ohio, Aug. 31.—Members of the five big rail brotherhoods who have headquarters here are voting directly on the question of a strike, it became known today. Copies of the ballots sent out to the half million membership of the five unions were obtained today by the United Press and show conclusively that the question is on whether to strike or accept the wage reduction offered by the United States Rail Labor Board.

Examination of the ballots show the wording is practically identical with that of the Trainmen, Clerks and Shop Workers' Unions, which have already voted overwhelmingly in favor of a walkout.

The five brotherhoods consist of trainmen, engineers, firemen and engine men, conductors, and switchmen, are the "key" to the entire rail situation. A strike by them would inevitably result in a general tie up of the nation's railroad facilities, both union leaders and railroad officials agree.

BIG NAVAL BALLOON REPORTED BLOWN UP

Brockaway Point, N. Y., Aug. 31.—The Naval Air station here reported this morning that a naval ballon had exploded. It was said it had not as yet been determined whether anyone had been injured.

Washington, Aug. 31.—Fire caused by an explosion of gasoline today destroyed the naval balloon D-6 in its hangar at Rockaway Point, N. Y., the Navy Department announced today. There was no loss of life. Several men were slightly burned in the explosion, the Navy Department report said.

Frederick Fairchild Barratt, infant son of Mr. and Mrs. Fred F. Barratt, died at the home of his parents at 2 o'clock Tuesday morning.

Mr. and Mrs. John Bowman of Daisy street are visiting friends and doing some shopping in Philadelphia this week.

MACHINE GUN HALTS RIOT OF STRIKING MINERS

State Troops Rushed To Brownsville To Help Sheriff Quell Big Disturbance There.

Brownsville, Pa., Aug. 31.—State police were rushed to Simpson, near here early today to quell a threatened uprising of miners now on strike at the Mt. Allison works.

Sheriff I. I. Shaw and his deputies went to the scene of the disturbance this morning, taking with them a machine gun and the miners fled for cover.

MEXICAN COURT DECISION MAY SETTLE DISPUTE

Oil Land Clause In The Mexican Constitution Declared To Be Non-Retroactive.

Washington, Aug. 31.—Should the State Department find the reported decision of the Mexican Supreme Court on the oil land question as a flat recognition that no American property is to be confiscated, this government will begin immediately consideration of recognition of the Obregon government, it was declared here authoritatively today.

Although the State Department was without official confirmation of the decision of the Mexican court declaring Paragraph 4 of Article 27, of the Mexican constitution as non-retroactive, it was satisfied when first given news of the decision by the United Press that such a step would settle the long standing dispute.

NEW YORK STOCKS

"UNCLE JOE" CANNON NO "QUITTER"

Washington, D. C., Aug. 31.—"I'm no quitter" declared Uncle Joe Cannon today in denying reports he intended to retire from Congress at the end of his present term.

The former speaker of the House is now in his 86th year and has represented the 18th Illinois district for 23 terms, coming to congress in 1873.

He was not visibly affected by the report. He leaned back in his chair, smoking one of his favorite long black cigars while he waited for his secretry to type the statement denying it.

BELFAST ABLAZE AS RIOTING IS AGAIN RESUMED

Dozen Fires Burn In The Catholic Section Of Belfast Early Today.

DEATH TOLL IS NOW UP TO 13

Officers And Men Of The Irish Army Ordered To Be Ready To Fight.

Belfast, Ireland, Aug. 31.—Belfast was in flames early today. A dozen fires were burning in the Catholic section of the city. More troops were pouring in to the district where sporadic fighting and sniping from the housetops, accompanied by an occasional bomb explosion, continued thru the night. The death toll has now mounted to 8, with 54 wounded.

Irish Army Men In Readiness.

Dublin, Aug. 31.—Officers and men of the Irish Republican Army have been ordered to hold themselves in readiness for instant mobilization.

"The termination of the truce is threatened," the Irish Bulletin, Sinn Fein's official organ, declared today. Preparations for a resumption of hostilities are being made throughout the country.

Fighting Rages Among Shipworkers.

Belfast, Ire.—Aug. 31.—Terriffic fighting broke out afresh today when shipyard workers, on their way to work, were ambushed and cut down by rifle fire in George and Queen street. One man was killed and scores of workers injured.

The military drew an armed cordon around the area where the fighting was most severe but at noon and during the lunch hour fighting was resumed. Rifles and grenades are being used by both sides and many casualties are reported.

Death Toll Now 13.

Belfast, Aug. 31.—Five more persons were killed in the fighting here today, bringing the death toll to 13 at 5 o'clock this evening, with the fighting still going on.

EFFICIENT MAYOR IMPROVES CONDITIONS OF COMMUNITY

To the citizens of Junior Chautauqua town and their Mayor, Ellwood Davis, the kiddies of the Children's Home send grateful thanks.

During its very short existence, busy town raised forty-five dollars, all the inhabitants working heroically together under the able leadership of Miss Lewis, the Junior director. The boys brought cushions and rented them to Chautauqua goers at the afternoon and evening sessions and the girls made candy and sold it.

With one accord it was agreed to use the money to give pleasure to comrads not so fortunate as themselves, so books, balls and playground equipment for the Children's Home will do their best to compensate for lack of fathers and mothers and honest to goodness homes.

Seigfried, the very capable second sacker of the Terriers, who suffered a badly sprained ankle in the first game on the local grounds with the Allegheny Steelers, and who has been visiting at his home the past ten days, returned to Clearfield last evening and will remain until the finish of the season.

The Osceola Steelers will be the attraction at the Driving Park on Thursday afternoon. Johnny Meader is scheduled to pitch for the Terriers and Knetzer will do the twirling for the Steelers and this should ensure a real baseball battle. Come out and see us do them.

Mt. Union will play here on Saturday afternoon instead of the Indiana team, which went up after last Saturday's game.

That game with the Philadelphia Athletics on September 7th should attract a record crowd to the local park.

This Satisfies the Curious

"Say, what building's that?" Every Washington visitor used to ask stupid car conductors and traffic cops that when they passed the Post-office Department on Pennsylvania Avenue. Now Will Hays, postmaster general, has put a sign over the door to identify the place.

ATTORNEY GENERAL MAKES STRONG APPEAL FOR LAW ENFORCEMENT

First Public Speech Since He Took Up His Official Duties

For the first time since assuming his post as Attorney General of the United States, Attorney General Daugherty today came forth from behind his barrage of legality, and addressing the Ohio State Bar Association at its meeting at Cincinnati, charged full tilt at the ranks of lawbreakers. Decrying the present movement toward lawlessness and non observance of the statutes of this comtry, Attorney General Daugherty laid down his views of law enforcement and wound up with the statement that as long as he remained the nominal head of the Department of Justice the law would be enforced to the utmost of his ability.

His speech, in part, was:

"I know it is often said that this is the wealthiest and at the same time the more materialistic age in the world. That is true in a certain sense, but it is also true that the common wealth of the age as well as the sum total of individual wealth furnishes the opportunity for the achievements that have been accomplished. Our schools and colleges, our libraries, our homes of comfort, our means of transportation and communciation, and all our means of enjoyment of life, are physical conditions necessary for spiritual as contrasted with material upbuilding.

Conservation the Law of Supremacy.

The right of property on the one hand, of life, of liberty, of the pursuit of happness on the other, are not antagoniste and hostile, to be set off in terms of opposition. Material wealth is the handmaid of spiritual achievement—that is, of intellectual, social and moral achievement. All progress is conditions on the principle of conservation. Conservation, or preservation as it is usually termed, of the wealth of the world, whether it be in the realm of the material or spiritual, is condition on the supremacy of the law. If there is one fact that history teaches above another ,it is that the rights incident to wealth and the rights furnishing the opportunity to enjoy spiritual, intellectual, moral and social things are conditioned upon the supremacy of the law.

The supremacy of the law, though challenged, is not undermined by the ordinary criminal who commits murder, robbery, larceny, etc. To the contrary, every occurrence of crimes of this sort tends to impress upon society the profound importance of the supremacy o fthe law and its vigorous enforcement. The supremacy of the law is and has been challenged mainly in that class of legislat in where there exists a difference of opinion as to governmental policy in enacting the legislation in question.

Suggest Old Methods.

Disrespect for law has manifested itself in the past mainly by large corporations or aggregations of wealth, commonly known as big business, and by labor organization in relation to such business. I am not much in favor of new nostrums and panaceas to cure the ills of the body politics, but I venture to make the following suggestions:

First, it is an undisputed fact that the public have a right to know what the quarrel is about in every actual or threatened strike or lockout, and similar controversies;

Second, there should be some definite agencies in government for ascertaining these facts fully and making an impartial finding by those specially qualified both by temperament and training to do this particular kind of work; and such finding should be reported so that it will be a reliable source of knowledge to which students and pubilcists and statesmen can resort.

Third, compulsory jurisdiction over those two factors to compel them to submit to an inquiry of this sort is not only desirable just just.

Fourth, at present our study of this questions has not been sufficiently thorough to warrant legislation compelling the acceptance of such findings by the parties thereto. Therefore, the jurisdiction of the proper agency should be obligatory upon the parties to submit to the investigation; the acceptance of the finding by the parties should be voluntary.

Fifth, the experience of the past shows that in most cases full, accurate, reliable publicity has been sufficient to compel an adjustment of these cases. Public sentiment is a controlling factor, and it is important, in justice to both of the parties, that it should depend upon something more accurate than successful propaganda.

Sixth, in the course of time knowledge of the nature and causes of these controversies derived in this way may crystallize public sentiment to the extent that laws can be enacted making such controversies impossible.

Political Offenses.

I have been discussing acts and conduct as a basis for disrepect for law. I now turn to a consideration of several subjects that tend to create disrespect for law not by specific acts merely, but by attempts to justify those acts by certain theories of po-

GYPSY CARAVAN GETS THE COLD SHOULDER HERE

Three Truckloads Pitch Their Camp Near Hyde City But Are Ousted By Officials.

PROVED THEIR PERSISTENCY.

Moved On To Clearfield Creek And Kept On Moving When State Copper Appears

Three truck loads of Gypsies who hit this section yesterday met with a very inhospitable reception. There were about twenty-five dirty, frowsy looking men, women and children in the outfit and when they attempted to pitch a camp at Hyde City, the director of public safety called out his police force and told them to move on.

They "moved on" as far as the grove along the bank at Clearfield creek and again started to pitch their tents. Corporal Novick and Chief Hitt drove out to the proposed encampment, found the Gypsies were without a license for Clearfield county and ordered them to move on once more and keep moving on until they got across the Clearfield county line.

They silently folded their tents and on they went.

AUTOIST VICTIM OF PECULIAR ACCIDENT

Scalded When Steam Blew Cap Off Radiator Of His Machine.

Joseph Beaston, who operates a coal mine in Lawrence township, was painfully injured in a peculiar manner yesterday afternoon. He drove out to his mine in his automobile and noticing that the machine was pretty hot he stopped and began to take the cap off te radiator. When he loosened the cap it shot up into the air, the red hot steam striking him severely scalded him about the head, face and arm, causing serious and painful injury.

Local Motorist In Sunday Auto Wreck

H. B. Snyder, of Clearfield, and his mother-in-law, Mrs. Thomas Byron, of Philipsburg, were painfully injured in an automobile accident which occurred Sunday last. Mr. and Mrs. Snyder and the latter's parents were automobiling over in Bald Eagle valley, when, in attempting to pass another car, their machine left the road and collided with a telephone pole. Mrs. Byron was thrown from the car into a barbed wire fence along the road and was very badly cut and torn. She is now a patient in the Philipsburg hospital.

Mr. Snyder received two or three broken ribs and other bruises. Mr. Byron and Mrs. Snyder escaped from the wreck unhurt.

Body Of American Non-Com Recovered

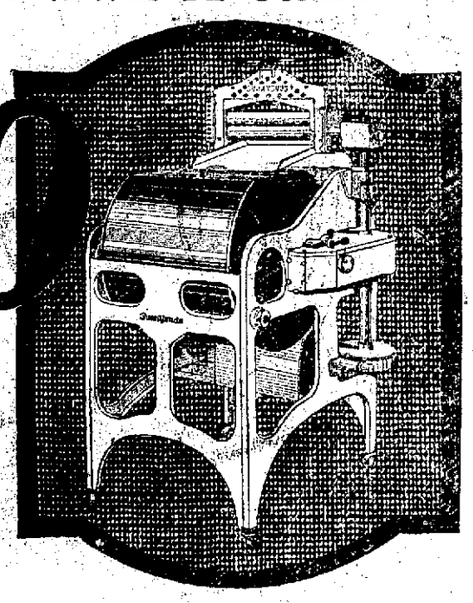

Hull, Eng., Aug. 31.—The body of George Welsh, American non-commissioned officer, who perished when the ZR-2 fell in flames in the River Humber last Wednesday, was today recovered from the river bed where it was found jammed in the wreckage of one of the gondolas of the big airship.

Health The Keynote To Beauty

Beauty means so much to women—power, social triumph, admiration and love. Beauty implies good health. Who ever saw a woman, racked with pain, struggling with weakness or disease, who could be called beautiful? The woman of today in this high-strung, nervous age is continually overdoing, with the result that ills peculiar to her sex develop which, unchecked will ruin all chances for her happiness. The natural restorative for such ailments is Lydia E. Pinkham's Vegetable Compound which for more than forty years has been recognized as a standard remedy for women's ills and has done much to relieve pain and restore good health to women.

"PEP"

One of the secrets of lasting youth is "pep"—and one of the most important builders of permanent "pep" is a daily bath.

Phone, write or call on us for your "pep" making equipment.

When you come right down to reason, what is there to "discount" tires—

THE next time a friend comes to you all excited about some wonderful tire bargain—ask him how much *value* he ought to get for each dollar of tire money.

It's astonishing that any car owner today should not know all the tire service he is entitled to.

Nor how to check up between the economy of par quality on one hand—and big discounts, surplus stocks, discontinued lines and retreads on the other.

* * *

For two years U. S. Tire makers have been telling the American people all about tires.

They have laid open the tire business from every angle.

They have always led the fight for better tires.

They have consistently maintained quality *first* standards with certain economy for the tire buyer.

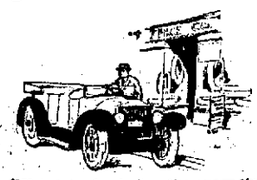

They have established 92 Factory Branches all over the country. Perfecting U. S. distribution so that you get a *fresh, live* tire every time you buy a U. S. Tire.

* * *

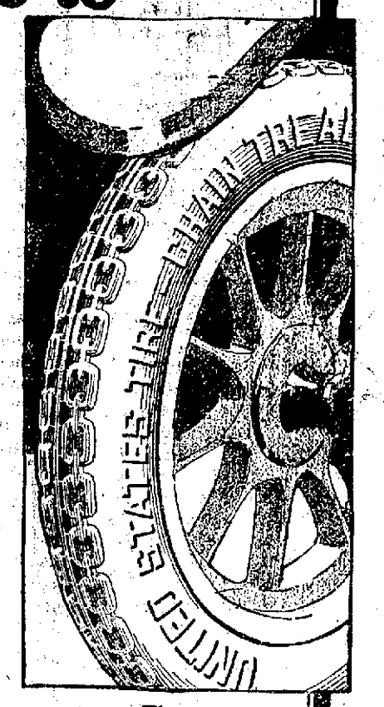

So when a man once decides on U. S. Tires he knows what he is getting in quality—service—economy.

In support of his own judgment he gets the pledged word and reputation of the largest and most successful tire concern in the world.

A sound reason for the fact that you see more U. S. Tires on more cars than ever this year.

"You get a fresh, live tire every time you buy a U. S. Tire.

The
U. S. CHAIN TREAD

One of the few tires of which it may be said that they deliver economy year in and year out and tire after tire.

EDWARDS MOTOR TRANSIT CO. Curwensville, Pa.

NEWS OF OUR NEIGHBORS

CURWENSVILLE

Joshua W. Sykes of Roaring Springs, Pa., was a town visitor this week. He is a tannery superintendent and it is said that he will be sent to this town to assume charge of Summit tannery when it starts.

A family dinner was given at the home of Mr. and Mrs. Ernest Post, at their home on South Pine street, at which a number of hosts were present and heartily enjoyed the hospitality afforded them by their hostess.

Mr and Mrs. W E. Tate, of Glendyn, Minnesota, are visiting in the home of Mrs. H. L. Burkett. They expect to remain several months in Curwensville and vicinity before returning to their western home. Mr. Tate is a native son of this county, but has resided in the West some time.

Prof. Norris desires us to once again impress upon the minds of parents who are starting their children this term for the first time to have them vaccinated before schools open and thereby save themselves, as well as the instructors, a vast lot of trouble. The law governing vaccination will be rigidly enforced in Curwensville schools this term, and all pupils who have not been properly vaccinated will not be accepted.

There are three empty store rooms in town at present, but investigation gleans us the information that all of them have been optioned.

A new barber shop has been started in the Grande house, next to Dr. Erhard. The new man has lowered the price of hair cutting from 50 cents and shaving from 20 cents to 15 cents. He is commanding quite a trade and has been operating only two weeks.

Through the courtesy of Dick Lantz, the writer was given a nice, smooth automobile ride to the county seat yesterday forenoon. Many interesting scenes bobbed up as we went along, slow enough to allow us to count the telephone poles for one thing, which could be written up very interesting had we the ability and inclination to do so. However, it was noticed that a half dozen State constables were scattered along the line, ostentatiously viewing the scenery, but in reality taking numbers of auto cars which were making a track speedway of the road. Some good, stiff fines would tend greatly to bring these speed hogs down to a realization that others have the right to travel this highway as well as they.

Chief Clark is determined to enforce the new car parking rule if he has to remain on duty day and night. He will carry out his instructions to the letter. Watch him.

Howard Addleman, only son of Mrs. Samuel Addleman, South South, and whose home is in Seattle, Wash., arrived in Curwensville Friday for a month's visit with his mothe rand sisters. He is employed in the U. S. postal service.

A number of blackberry pickers stirred up a den of rattlesnakes near Bear Run yesterday afternoon. Sixteen or twenty of the reptiles were slaughtered, and a number succeeded in escaping in the brush. It is estimated that there were nearly one hundred snakes in the bunch.

Two dances are advertised to take place in Curwensville, one a square dance on the evening of August 30th and the other on evening of September 1st, a round dance. Smith's orchestra will be on hand at the first and Maurey's orchestra will furnish the music on the second occasion.

WOODLAND

Mr. and Mrs. Stanley Ford of Port Jarvis, N. Y., are visiting at the home of Samuel Stone at Mineral Springs.

Mr. and Mrs. Herman Palmer of Clearfield spent Sunday at the home of Jno. Palmer at Mineral Springs.

Mr. andw Mrs. M. A. Peters spent Sunday at the home of Mrs. Peters' mother, Mrs. Triphena Riley, at Tyrone.

James Henchliffe and son James Jr., went to New York on Saturday evening where they will meet relatives coming from England.

Fred Herbert and family spent Sunday afternoon and evening with relatives in Munson.

Mrs. V. G. Henderson and Miss Gean Soult of the U. B. Sunday School and Misses Lydia Owens and Irma Pickles of the M. E. Sunday School are attending the Sunday School convention at DuBois Tuesday and Wednesday of this week.

Mrs. Robert Heberling and son Jack of Tyrone are visiting relatives here this week.

Stanley Woolridge of Philadelphia is visiting his mother, Mrs. Sarah Woolridge.

W. A. Develingf has purchased a new Paige car.

SHAWVILLE

Sunday school at Goshen 10:00 a. m. Archer Read, superintendent, wants to see a full attendance.

Don't forget the date Saturday, Sept. 3, the chicken supper at Egypt.

Shawville Sunday school will convene at 10:30 a. m. Mrs. Joseph Kyler will superintend the school.

Roy Watson was a caller on Sunday at the William Rich home.

Mr. and Mrs. Ray Wilson are the proud parents of a bouncing boy baby. Mother and child are doing nicely.

Mrs. John Wood of Clearfield is a week end visitor at her sister's, Mrs. Mearl Kyler.

The kind hearted people in the grove meeting gave Rev. P. J. Mahan, the evangelist in his free will envelopes, $30 for the services rendered while here.

Grease Spots on Wallpaper.

To clean wallpaper of grease spots, buy an ounce of pipe clay at any drug store and make a thick paste. Apply to the spots and allow to remain on over night. In the morning rub off with a clean cloth. It makes the paper like new, removing all the spots.

Evidently Did Not Fear Washington.

David Burns owned the farm on which the executive mansion and many department buildings now stand at Washington, a thrifty Scot, who objected to giving the land for Lafayette square. When Washington reminded him he would have been a poor tobacco raiser had the federal government not chosen his farm, he replied that but for a fortunate marriage Washington would have been an ordinary surveyor, but Washington got the land he wanted.

ODDS AND ENDS AND THINGS

"By Skinney"

Peter Kelley, aged 65 years, and a resident of Flat Rock, Centre county dropped into Philipsburg Friday last and enjoyed the luxury of his first shave at the hands of a barber. Up to this time Peter had been doing his own shaving and the women of the family placed a crock on his head and cut his hair around it very religiously twice each year.

* * * *

Chili has at last been bit by the "dry" bug and a movement is on foot to make the country dry just for the working man. The committee appointed to investigate the situation says:

"We find that the educated classes drink moderately and with gentility but when the workers drink they become intoxicated. Then they fight and kill each other. So we think prohibition is a good thing for them and believe we shall try it out."

It was the same spirit or idea that made the U. S. A. "dry". Let them go to it.

* * * *

'TAINT CLUBBY, YOU KNOW

Henry Ford is having as hard a time to reduce freight rates on his own railroad as he had getting the boys out of the trenches before Christmas, once upon a time. The other railroad executives think Henry's efforts to reduce freight rates is far from being "clubby" and the government officials in charge of such propositions appear to be of the same mind because for the third time in as many weeks the Interstate Commerce Commission thwarted efforts of Henry Ford to reduce rates on his railroad.

Proposed reductions on coal carloads from mines on the Detroit, Toledo & Ironton Railroad to Detroit Michigan, and other destinations on the same line in Ohio and Michigan were ordered suspended from September 3 to January 1, 1922.

The rates averaged 50 per cent reduction per net ton.

* * * *

LOTS OF THINGS WORSE THAN FARMING

"Life down on the farm" is not as onerous as it was in the old days, according to figures made public by the Census Bureau, showing the number of farms that have modern conveniences such as automobiles, telephones and electric light. In 1920, 1,979,564 farms in the United States had automobiles, the number of cars being 2,146,512.

Motor trucks were reported on 131,551 farms in 1920. The number of motor trucks on these farms was 139,169, with Pennsylvania leading with 9,372.

* * * *

Secretary of Commerce Hoover is not in favor of nationalization of the coal mines but he does favor a national coal exchange.

He says:

"If there could be a free market created without speculation, I think it would be a good thing for the industry and for the country generally."

Trade exchanges of other commodities have proved of great public benefit, he contiued, and with no central point now available for coal marketing an exchange has become almost a necessity.

* * * *

A Chicago woman wants a divorce from her husband on the grounds of pernicious and long continued excess kissing. The poor woman said hubby was such a kissing bug that she lost 44 pounds the past twelve months putting up with his osculatory excesses. We don't notice many Clearfield women falling away from such a cause.

* * * *

SHE OUGHT TO GET IT

Mrs. Helen Lichfield, a South Glen Falls, New York, woman, has brought suit against a doctor in which she asks for $10,000 damages on account of a little error the physician made. The doctor in question has a brother who is also a physician and both were operating at a Glen Falls hospital. Mrs. Lichfield desired to have a tumor removed from her breast by Dr. Arthur Chapman, but when she was wheeled into the operating room she was announced as Dr. George Chapman's patient and as Dr. George was waiting to remove his patient's appendix when the woman with the tumor came along he cut right into her and removed her appendix. Now the poor woman has to wait until she recovers from the appendicitis operation before she can undergo the operation she was scheduled for and she wants $10,000 to comfort her for the double ordeal. Can you blame her?

Aldrich's Critic.

"As time went on," says Ferris Greenslet of Thomas Bailey Aldrich "he was growing increasingly fastidious in the revision of his prose, and in the end he smoothed and filed it with the same loving, lingering care that he bestowed upon his poems. As he wrote in one of his letters: 'There is only one critic I stand greatly in dread of; he becomes keener and more exacting every month; he is getting to be a dreadful fellow for me, and his name is T. B. Aldrich. There is no let up.'"

Leader Feels His Power Gone.

In full health a stag is always proud of his ability as leader and champion and waves his gleaming flag boldly, signaling to his family that way. Hit him with a bullet, and down goes his flag instantly. He will save himself if he can. But he does not wave on the others to follow him. Scatter and save yourselves, he would say.

No Man Always Right.

The man who is always right does not live. He is still the prospective product of the development of the species. Even the one who generally thinks he is right will be found frequently to draw wrong conclusions but he's safer to follow.—Grit.

HOUSE OF DAVID FALLS BEFORE THE TERRIERS

Long Haired Visitors Are Shut Out By Locals In Tuesday Game

The House of David baseball team was the magnet which attracted twelve hundred people to the driving park yesterday afternoon. The "bearded giants" met the Clearfield Terriers in a snappy game which was good to look at and resulted in favor of the home team by the score of 2 to 0.

No Scores After First.

The Terriers scored their two runs in the first inning and after that time not a single runner crossed the plate for either side.

Wolfe, despite his name, was on the mound for the vegetarians, and after that first session veritably "ate 'em alive." He allowed but seven hits and but thirty men faced him.

Spiers, first man up, was hit on the foot by the pitcher. Callahan tripled to right, scoring Spiers, and a moment later came home on Getz's sacrifice fly back of second base. But six hits were made off Wolfe in the remaining seven innings.

Fileshifter Pitched Well.

Fileshifter held the whiskered fellows scoreless throughout the nine innings with but very little effort and was easily their master at every stage of the game. He was also given faultless support by his teammates, Zerfluh being an especially capable performer in the field.

The score:—

Clearfield	R	H	PO	A	E
Spiers, ss	1	1	1	0	0
Callahan cf	1	1	3	0	0
Getz 2b	0	1	1	1	0
Harris 1b	0	1	8	0	0
Hoffman lb	0	0	1	0	0
Crossin lf	0	0	1	0	0
Zerfluh 2b	0	1	2	3	0
Hopper c	0	1	9	0	0
Fileshifter p	0	1	1	2	0
Totals	2	7	27	6	0

House of David	R	H	PO	A	E
Falk c	0	1	0	0	0
Gibbs c	0	0	2	0	0
Klum cf	0	0	4	0	0

Clearfield .. 2 0 0 0 0 0 0 0 *—2

House David 0 0 0 0 0 0 0 0 0—0

Two-base hits—Zerfluh, Wolfe, Falk. Three-base hit — Callahan. Double plays—Zerfluh to Harris. Hit by pitcher—Spiers. Umpire—O'Donnell. Time of game—1:25. Attendance—1200.

GRAY STORAGE BATTERY COMPANY,

101 Locust St. Clearfield, Pa.

THE SCIENCE OF CHEMISTRY, mechanics, and electricity all enter into the production of a storage battery, so you must realize why it needs careful attention and the importance of keeping it fit. If your battery is run down and exhausted, we will re-charge it. We will bring it through to a vigorous old age by regular care and at a moderate outlay.

First Really National Bank.

Bank of North America was the name of the first bank of a national character. It had a charter for ten years, from 1741, from the confederation, but doubt as to its legality led the bank to seek and obtain a charter from the state of Pennsylvania in 1783. In 1785 this latter charter was revoked, but in 1787 it was renewed. It was located at Philadelphia.

Lancaster Pike First Turnpike.

The first turnpike in the United States was constructed between Lancaster, Pa., and Philadelphia.

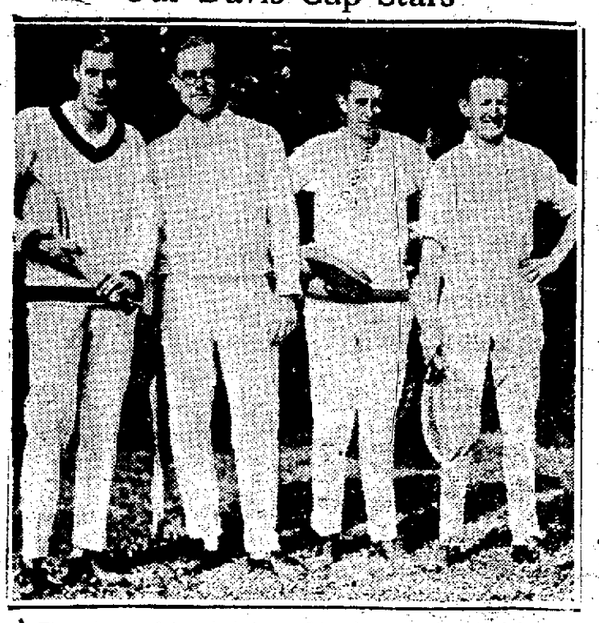

Cathedral of Mud and Wood.

Of the world's cathedrals, probably the most curious is that which crowns a hill in Uganda. In appearance it resembles nothing so much as a mountain of grass, although on closer inspection one is able to see that mud and wood have been extensively employed. The structure can accommodate 4,000 persons.

The Latter of Human Kindness, Eh?

With the opening of school rapidly drawing near, youngsters all over the state are anxiously awaiting the ringing of the school bell next Tuesday morning. Which leads us to the remark that the kids spend the entire summer vacation waiting for school to start, and then pass the whole school year anxiously looking forward to the last day of school and the first day of vacation. Such is the cycle of life of the youngster.

Chicago reports a big shortage of school teachers. Whether the feminist movement is responsible for this condition is not explained, but is said that the lack of teachers has forced the Chicago schools in many instances to work on the "two shift" plan. Inducements to enter the business world are claimed responsible for girls deserting teaching for better paid positions in business.

Evidence of the plight of unemployed service men was carried to cultured Boston, Massachusetts, last week, when Armand T. Gaudreau, University of Maine graduate, besought the American Legion employment bureau for any work that he could do. Previously Gaudreau, dressed in his collegiate cap and gown, appeared in the streets of the banking section, selling newspapers.

LAW ENFORCEMENT

Attorney General Daugherty's address before the Ohio State Bar Association at Cincinnati today is brimful of truth. Most salient is his assertion there is nothing wrong, fundamentally, with the laws of this country, but the attitude of many, who are potential law breakers, and officers who fail to do their sworn duty, is causing the greatest part of the wave of disturbance that is passing over the country today. Most agreeable is his announcement that as long as he heads the Department of Justice, he will do his utmost and call on the full powers of the government to back him in his fight to uphold the laws.

There is too much crime in this country today. Never before has it appeared so widespread as in the last few months. People have too little respect for the law. Is it due to the fact that too many reform laws are being passed to hedge the activities of the average citizen? One generally has a profound respect for the law as long as it does not tramp on one's toes. When it does, and laws are passed that seem to take away some of our personal liberty, are we too wont to be the victims of a mental rebellion, and in our anger belittle the advisability of such statutes?

Conservation of property, life and liberty is the basic aim of all laws. To have these laws enforced, they must be respected. It would seem that a campaign to make our laws respected and thus better enforced, would be the better thing right now.

On the other hand, THE PEOPLE are responsible for every law we have. Our laws are not the edicts of kings or emperors, but were selected, passed and made valid by representatives of the people. Until the people effect a repeal of any such law, it should be enforced to the last crossing of a "t" or dotting of a "i." As long as it not repealed by the people, it should be considered the will of the majority, and as such fully respected.

President Harding, in a campaign speech, summed up the entire situation when he said:

"No true American will argue that our laws should not be enforced. I refer to laws, no matter of what nature, whether they be those which deal with ordinary crimes and misdemeanors, or those which deal with acts of treason to the United States, threatening to the Constitution and the fabric of our social organization."

Wanted to Know Papa's Status.

Little Freddy at the breakfast table, after having tucked away one piece of cake, turned to his father and said, "May I take another piece of cake, papa?" Father, with years of training to his credit, answered, "You'll have to ask mamma about that, Freddie." Whereupon sonny piped up, "Haven't you anything to say at all, papa?"

Human Weights.

A woman, forty-three years old, five feet five inches tall, should weight 143 pounds, and a man forty-eight years old, whose height is five feet seven inches, should weigh 156 pounds, according to a table compiled by the Association of Life Insurance Medical Directors and the Actuary Society of America.

The Uninformed.

At the height of the Derby fever in London two men were arguing on a literary subject on the top of an omnibus: "Well," said one, "John puts 'Bleak House' first and 'Martin Chuzzlewit' second." A hoarse voice interrupted from the seat behind. "Gentlemen," it said, "I don't know your pal John, but you're bein' had. There's no such horses runnin'."

Corncob Has Real Value.

The lowly corncob can be made into many useful articles, due to a set of discoveries made in the bureau of chemistry of the Department of Agriculture. After a high-grade adhesive is removed, pure cellulose, a very good quality of paper, and valuable lime products are recovered from the residue.

The Function Of The Commercial Bank

Commercial Banking is the foundation of all banking. For the chief aim of modern banking is the is the fostering of industry and business, and that is the special sphere of the commercial bank.

Large industries canont exist in a community without large banking facilities. The commercial bank serves its community in proportion as it fosters her industries.

The County National Bank is the oldest commercial bank in this section of the State.

It invites accounts of all classes and of all sizes.

BUSINESS AND TRADE

News of Local Interest
With Special Attention to Coal, Clay and Brick Trade

WHOLESALE PRICES TENDING TO STABILIZE

"There is evidence that general wholesale prices are tending to become stabilized. Bradstreet's index for August 1 showed an increase of 3 per cent. over July 1, which is the second consecutive increase in this index. Dun's index rose 2.4 per cent over July 1 and that of the Federal Reserve Board 1.4 per cent., while the Department of Labor's all-commodity-index was the same for July as for June.

"On the other hand, the maladjustment of prices of many commodities relative to other commodities noted in earlier numbers of the Guaranty Survey continues, although there is a definite trend toward normal relationships. The prices of some basic commodities such as copper, tin, hides, cotton and tobacco are well below pre-war averages, while the prices of others, such as bituminous coal, brick and lumber, are well above.

"The malajustment in the prices of imported raw materials is even more pronounced, silk being far above and rubber far below average prices in 1913. In general; farm products and raw materials are close to or below pre-war levels, while manufactured goods on the whole are considerably above. Stabilization of prices at some level in accordance with their normal relation one to another, however, is more to be desired than their return to any particular former level.

UNEMPLOYMENT IN THE UNITED STATES

The estimate of the Secretary of Labor that 5,735,000 workers are now out of employment, while based on comparisons with the number employed at the height of last year's prosperity, shows the seriousness of industrial conditions. Owing to the mobility of labor, the seasonal nature of much production, and the fact that our economic system is never in perfect adjustment, there is at all times a certain number of unemployed, which a statistical study shows averaged in the years 1902 to 1927 about 3,400,000 in midwinter and 1,900,000 toward the end of the harvest season. Nevertheless, even when allowance is made for the unusual basis upon which the Secretary's estimate is made, it is seen that unemployment is much above normal, and it may increase as the season advances and harvest hands return from the fields.

In spite of unfavorable weather during July, the Government Crop Report of August 1, showing an estimate yield for all the grains of 5,131,000,000 bushels, compared well with the average yearly production for the seven years 1913-1919 inclusive, of 5,169,520,000 bushels. The estimated cotton yield of 8,203,000 bales, due largely to restricted acreage, is far below the seven-year average of 12,528,000 bales, as also are the estimated tobacco yield of 889,000,000 pounds, compared with an average of 1,192,428,000 pounds, and the estimated potato yield of 316,000,000 bushels, against the average of 371,123,000 bushels. These estimated yields are all considerably short of the 1920 production, which established records for several crops, but they are being produced at considerably lower cost than last year's crops. The progress of general business revival will depend largely on the prices which the farmers will receive for this years' crops. The prices for farm produce which normally rise a little in July, increased by slightly larger amounts this year than is usual.

ATTORNEY GENERAL

Contiued from Page 1

litical philosophy. And of these, the first is the doctrine of so-called political offenses.

Political offenses is a term, as you know, of international law used to denote certain classes of offenses which are expected from the operation of treaties of extradition between States. The offenses comprehended under this term for which extradition will not be granted are usually those involving matters pertaining to civil, religious or political liberty. The state in which the fugitive has found asylum frequently reserves to itself the right to refuse to surrender such fugitive on the ground that it is one of the excepted cases under the extradition treaty. The principle is that two sovereign states do not necessarily have the same civil, religious or political standards of liberty; that one nation may abridge liberty and prescribe penalties for doing certain forbidden acts, which abridgement is utterly opposed to the fundamental political philosophy upon which such other nation exists.

In this country there is now being disseminated an extensive propaganda to dignify the crimes committed by many persons who are now in prison for disloyal conduct or for obstructing or hindering the Government in prosecuting the war with Germany, and, by means of such propaganda, to create a public sentiment not only to have such criminals freed, but to have this general doctrine of political offenses recognized as a part of our domestic law, the purpose being, when the doctrine is once recognized, to enable criminals and those in sympathy with them to continue such opposition to law and order with impunity.

No Excuse Here

There might have been some excuse for the recognition of such a doctrine in the schisms and controversies, rebellions, revolts, and revolution of the old world, whose history has been in some states one continuous struggle between the arbitrary exercise of tyrannical power on the one hand, and the just fight for civil, political or religious liberty on the other. Again, no organ of government existed in many of these states for the sovereign will of people to express itself. Hence, revolution, rebellion, revolt, and feud within the state were the agencies that necessity compelled the mto invoke in order that the spirit of liberty and democracy might express itself.

The question of the limitations of personal liberty is, in the first instance, a question of political philosophy and not of law. In the evolution of government we have gradually limited the sphere of individual liberty. A study of the history of legislation wherein personal liberty has been limited by statute will show that these enactments have been vigorously challenged, and the same arguments have been used against violation of personal liberty that we hear today.

Only View That Of Enforcement.

From the standpoint of the Government, the only sound view is that of law enforcement. Whatever differences of opinion exist in the views as to the wisdom of some of these laws can be of no concern to the agencies for law enforcement. The Executive Department cannot make the laws. It is equally true that it cannot nullify laws. To refuse or to neglect to enforce a valid enactment of the legislative department of government, or to enforce it mechanically or half-heartedly or to wink at its violation, is without justification on any sound theory of government. Those who ask it or expect it not only contribute to lawlessness but destroy the basis upon which their own security rests. Our safety and happiness lies in obedience to law by every man, woman and child within the domain of our Republic, and no one can undermine respect for law without being, to that extent, an enemy to law and orderly government.

I am opposed to any system of government in which the rights of any individual or group of individuals depend upon the whim or caprice or temperamental attitude of any public officials.

If any citizen dislikes the law under which he is living, his relief is thru the legislative department of government, and not through those who, under the constitution, have the sworn duty of enforcing the law. As a citizen cannot choose what laws he will obey, so, likewise, those charged with law enforcement cannot choose what laws they will enforce. The only sound position for those who favor respect for law to take is that those charged with law enforcement must enforce all the laws, and all good citizens must obey all the laws; neither can exercise any right of choice in this matter without placing themselves above the law. It is the part of faithful officials to enforce and the part of good citizens to obey them.

America For Americans.

It is the duty of the minority as well as the majority to obey the law. My experience in the last few months as head of the law enforcing department of the Government has carried to me the conviction that these things sould be said to the general public.

If laws are obnoxious to the people it is their province to repeal them. Until they are repealed they must be observed and enforced without fear or favor.

The Government will endure on the rock of law enforcement; or it will perish in the quicksands of lawlessness.

Those who do not believe in our government and the enforcement of our laws should go to a country which gives them their peculiar liberty.

To those who come to our shores to take advantage of American opportunities it is becoming to wave the hand of welcome. But it is our duty to warn them to stay away unless they intend to observe our customs and obey our laws.

My duty is clear. As long as I am the responsible head of the Department of Justice the law will be enforced with all the power possessed by the government which I am at liberty to call to my command."

BUSINESS AT BELL'S LANDING

The coal mines of the Good Coal and Clay Company, after having been shut down the greater part of the summer, began work Monday morning, Aug. 29th with a full crew.

The Pennsylvania Coal and Fire Clay Corporation expects to be ready to ship coa lin a few days. Under the the able management of R. L. Derrick, the work has been going along very nicely.

The Harbison-Walker clay mines are still idle, with little sign of operations starting before the first of the coming year.

A ne wcoal company has been taking up some acreage in this vicinity and it is rumored that they expect to begin operations this fall.

Pests Able to Travel Far.

Investigations have shown that certain kinds of malaria-bearing mosquitoes can fly over four miles.

Books and Friends.

One cannot celebrate books sufficiently. After saying his best, still something better remains to be spoken in their praise. As with friends, one finds new beauties at every interview, and would stay long in the presence of those choice companions. As with friends, he may dispense with a wide acquaintance. Few and choice. The richest minds need not large libraries. That is a good book which is opened with expectation and closed with profit.—A. Bronson Alcott.

Would Be Worth Seeing.

In the geometry class a difficult problem arose. The teacher informed the pupils that he would put it on the blackboard and explain it. After carefully and tediously working on the diagram he addressed the class thus: "I want every one in this class to watch the blackboard now as I run through it."

"Bonanza" Signifies Good Fortune.

"Bonanza" is a Spanish word meaning "fair weather" or a "favoring wind." It is used in mining districts to signify an abundance of precious metal or rich ore. The miners of Comstock Lode, a wonderful gold and silver mine in Nevada which yielded 340 million dollars worth of ore in thirty years, first used "bonanza" in this way. The word is now also used to signify any good fortune or successful enterprise.

China Clay.

China clay is nothing but decayed granite and much of it is dug up from pits in Cornwall, England. It is mixed with water and run into a series of ponds, where the heavy impurities sink to the bottom, leaving a thin paste of fine clay. When this settles it is dried into bricks, ready to go to the potteries.

Telling Age of Mistletoe.

It is a comparatively easy matter to learn the age of growing mistletoe, as each shoot sends off two new shoots each year, and by counting the joints from the root to the tip of any branch the number of years the mistletoe has lived may be computed easily.

FARM CALENDAR

Farm Practice—Remember to seed wheat a week to ten days later than is customary in your locality to obtain the best control over the Hessian fly.

Machinery—See that machinery for seeding wheat, cutting corn, filling silos and digging potatoes is all in good working order. One cannot afford to delay the work by having to wait for a machine to be put in order when the time arrives to do this work.

Forestry—If you are dissatisfied with the crop of weeds and briars now showing up at their best on abandoned hilly farm land, plan to plant forest trees on it next Spring.

Poultry—The Fall markets are usually very good for fat hens. Any birds that are not going to be profitable to keep over the winter should be disposed of now. They should be fattened about ten days before shipping. A wet mash with plenty of corn chop and milk together with restricted exercise will do the trick.

Dairy—The dairy cow is the farmer's best bet. With grain and livestock markets on the decline, the butter market shows an upward tendency. The price of dairy products shows less fluctuation than other agricultural products.

Feeding New Oats—Begin to feed new oats gradually, mixing them with ol doats or corn. After the horse becomes accustomed to them there will be no danger from illness.

Garden—String beans too old to snap will make good seed. Do not save pods showing disease spots as they will mean seed unfit to plant.

Grain Moth—Bins showing the presence of grain moth should be well fumigated with carbon bisulphide spray.

SEPTEMBER WEATHER

In most sections of the country September is usually considerably cooler than August, but with some high temperatures, especially between the Rocky Mountains and the Mississippi River. Temperatures of 100 degrees or slightly higher have been experienced in this area, but to the east of the Mississippi River only a few stations have records as high as 100 degrees in September. Cool weather may also be experienced during this month; in fact, killing frosts have been known near its close as far south as Oklahoma and Tennessee. The average date of the first killing frost in fall in the Dakotas, Minnesota, northern Wisconsin, and the interior Northeast ranges from September 15 to 25.

Rainfall in most districts east of the Rocky Mountains is appreciably less in September than in August, but in a fe winstances it is somewhat greater. In New Mexico and Arizona precipitation is lighter, but in the northern Pacific coast sections there is usually a marked increase in rainfall during this month, the averages ranging from 4 to 6 inches, against 2 inches for the preceding month.

Personal Charm.

Unselfishness is one of the keys to personal charm, which means good manners. The woman who would be a successful woman, a woman of charm, must be an unselfish woman. She must be unselfish in her own interests. She must repress natural instincts to be bad-tempered when she is tired, to retort sharply when contradicted on her own particular subjects. She must listen when she wants to talk, and she must never, for one moment be off her guard in the world.—Exchange.

All Due to the Women.

In a lecture before the Royal Institute, Prof. Arthur Keith, an eminent biologist, gave the credit for American success to the women who came over with the Pilgrim fathers. The fact that these Englishmen brought their wives with them is responsible for the remarkably sturdy condition of the American people; whereas the Spaniards who went into Central and South America left their wives behind, and the result is a hybrid race which is not the equal of the original Iberian.

Seek Employment Worth While.

Let your employment be such as may become a rensonable person; and not be a business fit for children or distructed people, but fit for your age and understanding. For a man may be very idly busy, and take great pains to so little purpose, that, in his labors and expense of time, he shall serve no end but of folly and vanity. There are some people who are busy, but it is, as Domitiun was, in catching flies.—Jeremy Taylor.

Pleasant Walks and Talks.

These nice Sunday walks, when two friends get to know one another so intimately; these Sunday-evening talks, when you gather by twos and threes in the firelight, and talk so freely; oh, what a power they are for good, if used aright; what a power for harm, if wasted or misused! No one wants you to force the conversation into an edifying channel; but one knows how to talk bifurcates, as it were, and how often there is a choice between high and low, wise and foolish, kindly and unkindly.—Elizabeth Wordsworth.

JIGGS AND MAGGIE WILL ENTERTAIN THEATRE GOERS

Realizing that a popular subject requires much more than a popular interpretation, the unusual is once more manifest in the latest triumph, "Bringing Up Father In Wall Street," the effervescent three-act musical comedy, based on the ever-green and always welcome cartoons of the same name, will be the next attraction at the Driggs theatre Thursday. It is a different sort of entertainment and built on lines not in common with the conventional or ordinary offering. It contains a really absorbing plot with a plentitude of esparkling tunes, melodies, features, screams, mirth-provoking situations, surprises, novelties, and is on the whole genuinely funny and irresistibly enjoyable. The laughs are incessant, yet the result of natural sequence and continuity. Those familiar with the characters in the cartoons of course know or have heard of Jiggs Mahoney.

Jiggs is undoubtedly the most beloved Irishman on the stage today. Not the exaggerated, burlesque type one has been accustomed to see in the past. But a regular human being, right from life, who knows how to enjoy himself even in the face of the shrewish attempts of Maggie, his wife, who attempts to will otherwise. Jiggs has been entrusted with another good role this time and he may be expected to enthuse and amuse his million of admirers and friends as he has in the past. Lest we forget—there is Dinty Moore, Jiggs' pal and body-guard; Clarence, Jiggs' nephew, who now has become a lawyer, and the rest of the Mahoney clan whose vagaries and adventures hold welcome space in the dailies and periodicals of our glorious country almost day in and day. What would be America without Jiggs. And what would be Jiggs without the United States? Both are an institution. So say all of us as long as they both are extant there should be no use for a League of Nations! This unique and extraordinary production comes here from Altoona.

Gossip for Tonight's Tea Table

R C Rudberg of Lanse left Tuesday to return to college. He is a student at Upsala College and is returning to complete his sophomore year there.

Word was received Monday by J K Sloppy, of New Millport, that the body of his son Ivan, a Clearfield county hero of the World War, had arrived at Hoboken

Dr Stork left a fine big boy baby at the home of Mr and Mrs Judd Carns at 10 o'clock yesterday morning.

THE KITCHEN CABINET

(© 1921, Western Newspaper Union.)

To work, to help and to be helped, to learn sympathy through suffering, to learn faith by perplexity, to reach truth through wonder behold! this is what it is to prosper, this is what it is to live.—Phillips Brooks

WHAT SHALL WE HAVE TO EAT?

To have variety, economy and a well balanced day's meals, means careful thought and planning

Fillet of Lamb—Remove the bone from two pounds of lamb cut from the fore quarter, cut the meat in strips and pound until flat. Mix three tablespoonfuls of olive oil with three tablespoonfuls of vinegar and two tablespoonfuls each of minced onion and parsley. Pour the dressing over the meat and let stand over night. Serve browned in a hot pan. The bones may be cooked with vegetables making a fine soup.

Raisin Brown Bread—Take three cupfuls of yellow cornmeal one and one half cupfuls each of graham flour and white flour, one cupful of molasses, one and one half teaspoonfuls of soda, one half cupful of hot water, one teaspoonful of salt, three cupfuls of sour milk, one or two eggs and one and one half cupfuls of raisins Mix well and fill molds half full. Steam three hours or six in a fireless cooker, reheating once.

Chocolate Loaf Cake—One cupful each of sugar and sour milk, one teaspoonful of soda, two cupfuls of flour, two squares of melted chocolate one well beaten egg, one fourth teaspoonful of salt and one half teaspoonful of vanilla Beat well and bake in a loaf forty minutes. This cake, if slightly less flour is added makes a good layer cake. Put together with boiled frosting.

Tomato Fritters.—Beat one egg add one half cupful of water or stock one half teaspoonful of salt one quarter of a teaspoonful of pepper and one tablespoonful of finely minced parsley Add two cupfuls of flour sifted with three teaspoonfuls of baking powder Beat the whole together, then add two or three fresh ripe tomatoes peeled and cut in pieces, or one cupful of canned tomatoes and two heaping tablespoonfuls of grated cheese Cook by spoonfuls in butter and serve with a highly seasoned tomato sauce as an accompaniment to roast meat.

First Fall Millinery Opening

Thursday, Friday and Saturday, Sept. 1st 2nd & 3rd

If perchance you imagine that early Fall Hats are freakish just visit our Autumn Millinery display. Never have Hats been more becomingly or attractively fashioned than this Season's modes. They show very delightfully that the artistic designers may introduce the most startling innovations without anything bizarre or extreme even creeping in. Novelty of contour produces interestingly irregular shapes and new trimming effects are no less unexpected. Bristling quills, swooping feathers and jaunty ribbons are favorite garnitures.

All are cordially invited to this first showing.

ELIMINATION SALE
of All Remaining Spring and Summer
Coats, Suits and Summer Wash Dresses
